The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Selective Insurance Group Inc. business.

About Selective Insurance Group Inc.

Selective Insurance Group, Inc., through its subsidiaries, offers property and casualty insurance products and diversified insurance services and products in the United States.

Segments

The company operates in two segments, Insurance Operations and Investment Operations.

Insurance Operations

The Insurance Operations segment sells insurance products and services to businesses, non-profit organizations, local government entities, and individuals in exchange for premium primarily in 22 states in the eastern and Midwestern United States. This segment also provides federal flood insurance administrative services.

Insurance Operations Products and Services: The types of insurance it sells in its Insurance Operations fall into three categories: property insurance, which generally covers the financial consequences of accidental loss of an insured's real and/or

personal property; casualty insurance, which generally covers the financial consequences of employee injuries in the course of employment and bodily injury and/or property damage to a third party as a result of an insured's negligent acts, omissions, or legal liabilities; and package insurance, which is a combination of property and casualty.

The company underwrites and insures commercial lines of insurance primarily through traditional insurance and through alternative risk management products, such as retrospective rating plans, self-insured group retention programs, or individual self-insured accounts. Its main commercial lines of insurance products include commercial property; commercial automobile; general liability (including excess liability/umbrella); workers compensation, business owners policy (BOP), and bonds (fidelity and surety). It offers personal lines insurance for personal automobile and homeowners. It sells and distributes its products and services through independent insurance agents.

Competition: The company competes with regional insurers, such as Cincinnati Financial Corporation, The Hanover Insurance Group, Inc., and Harleysville Group, Inc.; national insurers, such as Liberty Mutual Group, Travelers Companies, Inc., The Hartford Financial Services Group, Inc., and Zurich Financial Services Group; and direct insurers, such as GEICO and The Progressive Corporation.

Investment Operations

The company's Investments Operations are based primarily in Parsippany, New Jersey, while certain segments of the portfolio are managed by external investment portfolio managers. As of December 31, 2009, its investment portfolio consisted of fixed maturities, equities, short-term investments, and other investments, including alternative investments.

Dispositions

In 2009, the company sold its human resource administration outsourcing (HR Outsourcing) business.

History

Selective Insurance Group, Inc. was founded in 1925.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
