This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes SGS SA competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SGS SA business.

## **About SGS SA**

SGS SA offers inspection, verification, testing, and certification services supporting international trade in agriculture, minerals, petroleum, and consumer products. The company also provides these services to governments, international institutions, and to customers engaged in the industrial, environmental, and life science sectors. It operates a network of approximately 1000 offices and laboratories worldwide.

### Services

The company conducts its operations through 10 business segments, including Agricultural Services; Minerals Services; Oil, Gas, and Chemicals Services; Life Science Services; Consumer Testing Services; Systems and Services Certification; Industrial Services; Environmental Services; Automotive Services; and Governments & Institutions Services.

**Agricultural Services:** The Agricultural Services segment assists clients in managing crops, seed development, conduct soil testing and harvesting, move product through the global supply chain and manage trade inspection at export and import.

**Minerals Services:** The Minerals Services segment provides services that range from quality and quantity inspection and testing for various commodities to services, which

optimize the recovery of metals in processing plants.

**Oil, Gas, and Chemicals Services:** The Oil, Gas, and Chemicals Services segment provides services and solutions for the oil, gas and chemicals industry, both upstream and downstream sectors.

**Life Science Services:** The Life Science Services segment provides clinical research and quality control testing services. The segment offers drug development services for Phase I to IV clinical trials, biostatistical management services, regulatory affairs services, and bioanalytical laboratory services, as well as quality testing capabilities in microbiology, analytical chemistry, biocompatibility, toxicology, microbiology, sterility, method development and stability testing to pharmaceuticals, biotechnology, medical devices and cosmetics companies worldwide. It operates a network of approximately 30 laboratories and offices, as well as 3 clinical research units in Europe, Asia, and the Americas.

**Consumer Testing Services:** The Consumer Testing Services segment offers a range of services, including testing, product inspection, process assessment, and technical assistance that work across markets and geographies.

**Systems and Services Certification:** The Systems and Services Certification segment offers audit, certification, training, and advisory services. It has certified approximately 100,000 clients worldwide.

**Industrial Services:** The Industrial Services segment provides technical verification, inspection, testing, and conformity assessment, instilling confidence to clients. The segment serves customers in the energy, process, and construction industries.

**Environmental Services:** The Environmental Services segment supports governments and industry in developing sustainable solutions, offering them guidance and assistance in complying with environmental regulations and in assessing their environmental performance. It provides laboratory and monitoring facilities, with consultants, together with a range of environmental services, such as impact assessments, auditing, training, air and water quality testing, and it also provides climate change solutions.

**Automotive Services:** The Automotive Services segment focuses on the design, construction, and operation of motor vehicle inspection solutions. These programs are provided to Governments, manufacturers, and financing and insurance companies, as well as consumers.

**Governments and Institutions Services:** The Governments and Institutions Services supports governments, institutions, and partner organizations by verifying trade information, setting up electronic business processing, and scanning operations and legal compliance in aid delivery schemes and forestry operations.

### Geographical Segments

The company's geographical segments include Europe/Africa/the Middle East; the Americas; and the Asia Pacific.

### Acquisitions

In February 2009, the company acquired 100% of Ustav Paliv a Maziv (UPM), which operates two laboratories in Prague and Kolin (Czech Republic) that perform fuel test, fuel conformity assessment, and engine testing services.

In October 2009, the company acquired 100% of EKO-PROJEKT Ltd., a provider of environmental and analytical services in Poland, with various laboratories and offices across the country.

### History

SGS SA was founded in 1878.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
