The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Shanda Games Limited business.

About Shanda Games Limited

Shanda Games Limited operates as an online game company in China. The company develops and sources an array of game content through multiple channels, including in-house development, licensing, investment and acquisition, co-development, and co-operation.

As of March 31, 2010, the company operated 26 MMORPGs (massively multi-player online role-playing games) and 8 advanced casual games. Some of its online games are also web games which it categorizes as either MMORPGs or advanced casual games, rather than as a separate category of online games. It licenses games from international and domestic developers. As of March 31, 2010, 11 of its online games were licensed from third-party developers. The company's game player base consists of approximately 10.4 million active paying accounts.

Games

MMORPGs

The company's MMORPGs are action adventure-based and draw upon themes, including martial arts adventure, fantasy, strategy and historical events. Each of its

MMORPGs creates a virtual world within which game players can play and interact with each other simultaneously over the Internet. As of March 31, 2010, the company operated 26 MMORPGs.

Competition

The company competes primarily with other online game developers and operators in China, including Changyou.com Limited, Giant Interactive Group, Inc., Kingsoft Corporation Limited, KongZhong Corporation, NetDragon Websoft Inc., NetEase.com, Nineyou International Limited, Perfect World Co., Ltd., Tencent Holdings Limited, and The9 Limited. Competition may also come from international game developers and operators, such as Activision Blizzard, Inc., Electronic Arts Inc., NCSoft Corporation, Nexon Corporation, and Webzen, Inc.

Significant Events

On September 9, 2010, Shanda Games Limited and China Network Television announced a strategic partnership to form a joint venture company to establish an online game video channel, as well as to engage in other related businesses such as online game operation.

History

Shanda Games Limited was incorporated in 2008.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
