Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Shanks Group plc business.

About Shanks Group plc

Shanks Group plc is an independent waste management company. Shanks is a major player in the waste management industry UK, Belgium and Holland. Beyond Europe, Shanks also has activities through its environmental remediation services.

The Group provides an extensive range of waste and resource management solutions and handles a wide variety of wastes, including domestic refuse, commercial waste, contaminated spoils and hazardous waste. Services offered include collections, domestic and commercial waste recycling, resource recovery, composting, mechanical biological treatment, thermal treatment, industrial cleaning, special waste treatment and modern landfill. Shanks also produces a range of fuel-from-waste products and is amongst Europe's largest producers of electricity from landfill gas.

Shanks offers a wide and often innovative range of waste management solutions within its various collection, transport, recycling, treatment and disposal services. The Group is a generator of electricity from landfill gas and produces a range of fuel-from-waste products. Industrial cleaning operations also feature among Shanks activities in all three countries.

Services

Collection

Shanks provides collection services to remove all varieties of waste including general construction, domestic clearance, bricks, rubble, concrete and hardcore. These can be collected using skip loaders, trucks with removable containers and roll-on roll-off containers.

Incineration

Shanks uses thermal processes to destroy waste, recover energy and recycle valuable resources. Incineration services are offered through specialist waste treatment centres or by developing dedicated systems for the customers.

Local authority waste

Shanks has been working in partnership with Local Authorities to provide waste solutions throughout England, Scotland and Wales, including municipal waste collection and recycling, disposal, cleansing services, and waste by rail.

Remediation

Shanks remediates contaminated sites using a range of technologies; excavation, haulage and disposal, containment, stabilisation, water treatment, thermal treatment, soil washing and bioremediation by Bio-Logic.

Managed services

Managed Services provides independent solutions for improving a customer's financial and environmental performance.

International solutions

Shanks provides international solutions for managing wastes and undertaking complex environmental remediation projects throughout the world, particularly in locations with no local resources or appropriate infrastructure.

Green products

Shanks offers quality products from materials originally destined for disposal, including animal bedding, compost and solvents.

Landfill

Shanks offers high quality disposal facilities nationwide.

Recycling recovery

Shanks has developed expertise and infrastructure to recover value from waste materials.

Industrial services

From PCB removal to laboratory decommissioning, from site clearances to design, build, finance and operate schemes, Shanks can provide a wide range of specialist services to industry.

Chemical waste management

Through the network of recycling, treatment and transfer facilities, Shanks is able to provide a complete solution for producers of chemical wastes.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
