Abstracts

Shaw Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Shaw Group Inc. and its competitors. This provides our Clients with a clear understanding of Shaw Group Inc. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Shaw Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Shaw Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Shaw Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Shaw Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Shaw Group Inc. business.

About Shaw Group Inc.

The Shaw Group Inc. provides technology, engineering, procurement, construction, maintenance, fabrication, manufacturing, consulting, remediation, and facilities management services. The company serves multinational and national oil companies and industrial corporations, regulated electric utilities, independent and merchant power producers, government agencies, and equipment manufacturers.

The company's proprietary olefin and refinery technologies, coupled with ethyl benzene, styrene, cumene, and Bisphenol A technologies, allow it to offer clients integrated oil refinery and petrochemicals solutions.

Business Segments

The company operates through six segments: Fossil, Renewables, and Nuclear; Maintenance; Environmental and Infrastructure (E and I); Energy and Chemicals (E and C); Fabrication and Manufacturing (F and M); and Investment in Westinghouse.

Fossil, Renewables, and Nuclear Segment

The Fossil, Renewables, and Nuclear segment provides a range of services, including

design, engineering, construction, procurement, technology, and consulting services primarily to the fossil, renewables, and nuclear power generation industries.

Nuclear Power Generation: The company provides a range of technical services, including engineering, design, procurement, construction, and project management that support the domestic and international nuclear power markets. The company has technical services contract for four AP1000 nuclear power units in the People's Republic of China (China) and three EPC contracts to build six domestic AP1000 units — two each for Georgia Power, South Carolina Electric and Gas, and Progress Energy.

Air Quality Control (AQC): The company's AQC business includes domestic and international markets for flue gas desulfurization (FGD) retrofits, installation of mercury emission controls, fine-particle pollution control, carbon capture, and selective catalytic reduction (SCR) processes used at existing coal-fired electric power plants.

Maintenance Segment

The Maintenance segment provides a range of client-tailored technical services to complement its EPC services for the electric power generation, refining, and petrochemical/chemical industries. The company provides clients with turnaround maintenance, refueling outage maintenance, routine plant maintenance, capital construction, reliability engineering, plant engineering, off-site modularization, and other specialty services. It restores, rebuilds, repairs, renovates, and modifies industrial structure, and offer routine and preventive maintenance services. Its services are provided at client work sites throughout North America.

Nuclear Plant Maintenance and Modifications: The company provides systemwide maintenance, modification, and capital construction services to 40 domestic nuclear reactors.

Fossil Plant Maintenance and Modifications: The company offers fossil plant maintenance services for energy generation facilities throughout North America.

Industrial Plant Maintenance and Modifications: The company has a continuous presence in approximately 90 U.S. field locations serving petrochemical, specialty chemical, oil and gas, manufacturing, and refining markets.

Capital Construction Services: The Maintenance segment includes a capital construction component serving existing and new clients. Capital construction projects

include renovations and green-field projects. Its scope includes constructability reviews, civil and concrete work, structural steel erection, electrical and instrumentation, mechanical and piping system erection.

Recovery and Rebuild Services: The company executes projects related to natural disasters and catastrophes, meeting client deadlines to rebuild and restore facilities to pre-damage capacity. The company's completed projects include petrochemical, natural gas processing, refining, and nuclear power facilities in Texas and Louisiana. It also coordinates emergency response projects, partnering with the U.S. government, and state and local governments to provide program planning and management.

E and I Segment

The E and I segment provides engineering, design and construction, construction ma

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
