The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Shenzhen Investment Ltd. business.

### **About Shenzhen Investment Ltd.**

Shenzhen Investment Limited operates as an investment holding company in China. The company is a mid-market property developer in southern China, which is 47.42%-owned by Shenzhen's city government.

The company, during 2008, was involved in the following principal activities: property development, property investment, property management, provision of transportation services, and manufacture and sale of industrial and commercial products.

The company, in addition to its own property development business, holds a 27.38% stake in Road King, and a 22.62% stake in Coastal Greenland. Its total land reserves include 10 million square meters (GFA), of which 1.97 million square meters are under construction.

The company has ownership interests in Road King and Coastal Greenland. Road King has a land bank of 5.61 million square meters (GFA), and Coastal Greenland has a land bank of 3.07 million square meters (GFA).

### **Segments**

The Property Development segment engages in the development of residential, industrial and commercial properties.

The Property Investment segment invests in residential, industrial and commercial properties for their rental income potential.

The Property Management segment engages in the management of both Group developed properties and non-Group developed properties.

The Transportation Services segment consists of the provision of taxi and passenger transportation services, automobile maintenance, cargo services and other related services.

The Manufacturing segment engages in the manufacture and sale of industrial and commercial products.

The 'Others' segment comprises, principally, the manufacture and sale of aluminum alloys and other businesses.

#### Projects under Development and land reserves

As of December 31, 2008, the company had 18 projects under construction with a total gross floor area of approximately 1,973,000 square metres. Out of these projects, 10 were at their pre-sale stage with a scheduled salable floor area of approximately 228,000 square metres. These projects include Water Pine, Nanhu Phase I, Shumyip Coast Phase III, Purple Kylin Hill Phase I, Noble Residence, Walin Lake Phase I and Phase II.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
