Abstracts

Shing-Mei International, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Shing-Mei International, Inc. and its competitors. This provides our Clients with a clear understanding of Shing-Mei International, Inc. position in the Industry.

The report contains detailed information about Shing-Mei International, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Shing-Mei International, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Shing-Mei International, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Shing-Mei International, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Shing-Mei International, Inc. business.

About Shing-Mei International, Inc.

Institutional Equity Holdings Inc. (the Company or IEH) was incorporated in 1994 in the State of Nevada. IEH is a holding company whose assets consist of the shares of common stock of its two subsidiaries, Institutional Equities Corporation (Equities) and First Atlanta Securities, LLC (FAS). Equities has ceased conducting business mainly because Equities owes the Internal Revenue Service (IRS) more than \$300,000 for employee with holding taxes and its license with the National Association of Securities Dealers has been revoked for failure to comply with an arbitration award against Equities.

Although not currently operating, FAS is intended to be a full service brokerage firm engaged in the purchase and sale of securities from and to the public and for its own account and investment banking activities. The company operates in one industry segment, the financial services industry.

PRINCIPAL PRODUCTS, SERVICES AND MARKETS

Virtually all of the company's business will now be carried on through FAS. FAS is involved in the purchase and sale of most investment securities but is not involved in commodities or futures. Three broad categories of securities activities contribute to

revenues of FAS: general securities (or retail), trading and market making (or wholesale) and corporate finance/investment banking. FAS also receives revenues from gains and losses in investment accounts, from the exercise of underwriter warrants received in connection with its corporate finance activities, and from other sources.

General Securities. As a securities broker, FAS acts as agent for its customers in the purchase and sale of common and preferred stocks, options and debt securities traded on securities exchanges or in the over-the-counter (OTC) market. A major portion of its revenues is derived from commissions from customers on these transactions. In the OTC market, transactions with customers in securities not listed on an exchange may be effected as principal, rather than agent, primarily where FAS is a market maker in that security. Customer transactions in securities are effected either on a cash or margin basis.

Pursuant to an agreement between FAS and Pershing Division (Pershing) of Donaldson, Lufkin & Jenrette Securities Corporation, Pershing carries all of FAS's customer securities accounts and performs the following services: (1) preparation and mailing of monthly statements to FAS customers; (2) settlement of contracts and transactions in securities between FAS and other broker-dealers and between FAS and its customers; (3) custody and safe-keeping of securities and cash, the handling of margin accounts, dividends, exchanges, rights offerings and tender offers; and (4) the execution of customer orders placed on an exchange. FAS determines the amount of commission to be charged to its customers on agency transactions and the price of securities purchased or sold in principal transactions. Pershing receives compensation based on the size of the transaction, subject to certain minimum and maximum amounts.

Trading and Market Making. In addition to executing trades as an agent, FAS regularly acts as a principal in executing trades. The level of positions carried in FAS's trading and investment accounts fluctuates significantly. The size of the securities positions at any date may not be representative of FAS's exposure on any other date, because the security positions vary substantially depending upon economic and market conditions, the allocation of capital among types of inventories, underwriting commitments, customer demands and trading volume. The aggregate value of inventories that FAS may carry is limited by certain requirements under the SEC's net capital rules.

FAS's market making activities are conducted both with other dealers in the 'wholesale market' and with FAS's customers. Transactions with customers are effected as principal at a net price equal to the current inter-dealer price plus or minus the

approximate equivalent of a brokerage commission. Securities are purchased primarily to provide an inventory for customers who wish to buy, and short sales are likewise made primarily to serve customers.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
