Abstracts

Sigma-Aldrich Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Sigma-Aldrich Corporation and its competitors. This provides our Clients with a clear understanding of Sigma-Aldrich Corporation position in the [Chemical](#) Industry.

The report contains detailed information about Sigma-Aldrich Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Sigma-Aldrich Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Sigma-Aldrich Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Sigma-Aldrich Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Sigma-Aldrich Corporation business.

About Sigma-Aldrich Corporation

Sigma-Aldrich Corporation develops, manufactures, purchases, and distributes chemicals, biochemicals and equipment worldwide. These chemical products and kits are used in scientific research, including genomic and proteomic, biotechnology, pharmaceutical development and as key components in pharmaceutical, diagnostic and other manufacturing.

The company operates in 38 countries, manufacturing approximately 48,000 of the 130,000 chemical products it offers. It also offers approximately 40,000 equipment products. The company sells into approximately 160 countries, servicing approximately 92,000 accounts representing approximately one million individual customers.

Products

The company has a customer-centric organizational structure featuring the Research units of Essentials, Specialties and Biotech and a Fine Chemicals unit, SAFC.

The Research Essentials unit sells biological buffers, cell culture reagents, biochemicals, chemicals, solvents, and other reagents and kits.

The Research Specialties unit sells organic chemicals, biochemicals, analytical reagents, chromatography and other laboratory consumables, reference materials and products.

The Research Biotech unit supplies immunochemical, molecular biology, cell biology, proteomic, genomic, transgenic and other life science products to academic, government, industrial, biotechnology and pharmaceutical research customers.

The SAFC (Fine Chemicals) supplies large-scale organic chemicals and biochemicals used in development and production by pharmaceutical, biotechnology, industrial, diagnostic and electronics companies.

Sales and Distribution

The company's individual customers include universities, pharmaceutical companies, commercial laboratories, industrial companies, non-profit organizations, governmental institutions, biotechnology, diagnostic, chemical and electronics companies and hospitals.

Significant Events

On August 5, 2010, Sigma-Aldrich Corporation announced it has entered into an agreement with National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health, and Boston University (BU) to develop methods to measure several potential biomarkers of atherosclerotic cardiovascular disease (CVD) using plasma samples from the NHLBI's Framingham Heart Study (FHS).

In December 2010, Plasticell had signed a collaboration agreement with Sigma-Aldrich Corporation. In the collaboration, Sigma-Aldrich will use its CompoZr Zinc Finger Nuclease Technology to engineer various human stem cell lines that enable tracking of differentiation to specific mature cell types via fluorescent reporters, integrated directly into developmentally expressed genes.

History

Sigma-Aldrich Corporation was founded in 1951.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
