Abstracts

Silicon Mountain Holdings, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Silicon Mountain Holdings, Inc. and its competitors. This provides our Clients with a clear understanding of Silicon Mountain Holdings, Inc. position in the Industry.

The report contains detailed information about Silicon Mountain Holdings, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Silicon Mountain Holdings, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Silicon Mountain Holdings, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Silicon Mountain Holdings, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Silicon Mountain Holdings, Inc. business.

About Silicon Mountain Holdings, Inc.

Silicon Mountain Holdings, Inc., through its subsidiary, Silicon Mountain Memory, Incorporated, engages in the development, assembly, and marketing of branded computer products. The company's computer products include computer systems, computer memory products, gaming laptop and desktop computers, and peripherals.

Products

The company offers a line of branded computer systems, DRAM memory and FLASH storage products, and peripherals. Its products include branded computers, servers, and peripherals.

Computer Memory Products

The company's memory products targets specific computing applications, including switches, routers, servers, workstations, desktops, and notebooks. Its computer systems include rack mount servers, workstation, storage systems, and related components.

Flash Memory Products

The company's FLASH products are used in a base of applications, ranging from industrial applications to networking applications to mobile consumer electronic devices.

CompactFlash memory cards: CompactFlash products provide interoperability with systems based on the PC Card ATA standard by using a passive adapter.

Secure Digital and MultiMediaCard Flash memory cards: These cards are used in data storage applications, including mobile phones, audio players, digital cameras, and other space constrained applications.

USB Flash drives: The company's USB FLASH drive portfolio consists of two models: a flash drive available in capacities from 1GB to 16GB; a model in capacities from 2GB to 16GB. Both USB Flash drive models utilize non volatile SLC NAND flash chips at low densities, and MLC NAND flash chips at higher densities.

ATA Flash PC cards: ATA Flash PC Cards are used in storage, data backup, and data logging applications. These products are available in the PC Card Type II form factor.

DRAM Products

The company offers a range of DRAM products, including dual in-line memory modules, small-outline, mini-registered DIMMs, very low profile, RDIMMs, and Fully-Buffered DIMMs. Its DRAM products are used primarily as personal computer, notebook, and server upgrades. The company's DRAM products are available in various memory module form factors and densities of up to 4GBs. It also offers these products utilizing different DRAM architectures, such as FB-DIMM, DDR, DDR2, SDRAM, and RDRAM.

Computer System Products

The company engages in the development, assemble, marketing, sell, and support a range of branded computer products that are customized to individual customer requirements. Its product categories include branded computer systems, servers, storage, and peripherals.

Servers: The company provides a line of servers, including rack, blade, and tower servers for enterprise customers and small organizations, and networks.

Workstations: The company's workstations are provided to professional users who

demand hardware platforms, such as three dimensional computer aided design, digital content creation, geographic information systems, computer animation, software development, and financial analysis.

Parts and Peripherals: The company offers third party peripheral products, networking products, video and graphic cards, power adapters, and other products. It provides, RAID controllers and Storage, a portfolio of storage solutions, as well as direct attached storage, network attached storage, and storage area networks.

Competition

The company's primary third party DRAM module competitors include Crucial Memory, Kingston Technology, Lexar Media, PNY Technologies, and SanDisk. Its value added reseller competitors include CDW, PC Mall, PC Connection, and Memory X. The company's direct computer OEM competitors include Dell, HP, Alienware, Gateway, and Lenovo.

History

Silicon Mountain Holdings, Inc. was incorporated in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
