The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Singapore Airlines Ltd. business.

About Singapore Airlines Ltd.

Singapore Airlines Limited engages in passenger and cargo air transportation, airport terminal services, engineering services, training of pilots, air charters and tour wholesaling and related activities.

The company offers mobile services, online flight services, on board services, First Class, Raffles Class, Economy Class, ground services, inflight entertainment and communication, and KrisShop.

The company has a codeshare cooperation agreement with US Airways Group, Inc. With this cooperation, US Airways customers traveling to Singapore would be able to connect on Singapore Airlines nonstop service from Los Angeles. From the Singapore hub, US Airways' customers can connect on Singapore Airlines to popular destinations in the Asia Pacific region, including Indonesia, Malaysia and Thailand. Singapore Airlines customers traveling to the exciting cities of Phoenix and Las Vegas can connect via Los Angeles or San Francisco on US Airways flights. Customers heading to Charlotte, N.C. can catch a connecting US Airways flight at New York's John F. Kennedy International Airport.

Strategic Alliances

Singapore Airlines has revealed that its codeshare agreement with Malaysia Airlines Co. Ltd. has been extended and strengthened. The agreement now includes SilkAir (Singapore) Private Limited, a regional carrier owned by Singapore Airlines. Together the three airlines would offer up to 15 flights per day between Singapore and Kuala Lumpur.

Significant Events

The company, in June 2008, inaugurated its all business class service to North America. The carrier operated its first roundtrip on May 16 with a nonstop between Singapore and New York's Newark Airport. The Airbus A340-500 used on the route is the first of five to be converted from a two-class configuration to the single all-business cabin. This new cabin also launches the first Apple iPod and iPhone compatible inflight entertainment system.

The company has signed an expanded code-sharing agreement with EgyptAir Airlines Company. Under the expanded pact passengers would be able to fly to Dubai from Singapore on the Asian carrier and catch a connecting flight to Cairo with EgyptAir.

The company and Air India Limited have signed a new bilateral frequent flyer program agreement. Under the agreement, frequent flyer program members of both airlines would be able to earn and redeem miles on flights operated by either carrier. This means members of Singapore Airlines's KrisFlyer program can earn KrisFlyer miles when they fly with Air India, or choose to redeem their miles for flights with the Indian carrier.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
