Abstracts

Singapore Technologies Engineering Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Singapore Technologies Engineering Ltd. and its competitors. This provides our Clients with a clear understanding of Singapore Technologies Engineering Ltd. position in the [Aerospace and Defense](#) Industry.

The report contains detailed information about Singapore Technologies Engineering Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Singapore Technologies Engineering Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Singapore Technologies Engineering Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Singapore Technologies Engineering Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Singapore Technologies Engineering Ltd. business.

About Singapore Technologies Engineering Ltd.

Singapore Technologies Engineering, Ltd. operates as an engineering company that provides solutions and services in Aerospace, Electronics, Marine, and Land systems.

SINGAPORE TECHNOLOGIES AEROSPACE (ST Aero)

ST Aero is a major third-party, independent aviation maintenance, repair and overhaul (MRO) companies. It supports a range of commercial and military aircraft, engines, and components from a network of strategically located aviation hubs worldwide. Its three key business areas are Aircraft Maintenance and Modification, Component/Engine Repair and Overhaul, and Engine and Materials Services.

Aircraft Maintenance Modification (AMM)

ST Aerospace's Aircraft Maintenance and Modification (AMM) operations serve commercial and military fleets worldwide through specialist subsidiaries and associate

companies.

ST Aerospace engages in McDonnell-Douglas wide-body maintenance and modification, and operates helicopter maintenance facility. The company also provides heavy maintenance, structural repair, and aging modification work for commercial fleets including Airbus, Boeing, McDonnell-Douglas, Lockheed Martin, Cessna and Embraer aircraft.

In the defence arena, ST Aerospace offers total support for the fighters, transporters and helicopters of air forces. An Authorised Maintenance Centre for the Fokker 50, C-130, Bell and the Super Puma, the company regularly services the A-4 Skyhawk and the F-5 Tiger as well.

Component/Engine Repair & Overhaul (CERO)

ST Aerospace's Component/Engine Repair & Overhaul (CERO) operates as an independent component repair and overhaul station in the Asia Pacific with capabilities in approximately 8,000 military and commercial components.

CERO repairs and overhauls mechanical components (heli-dynamics, transmissions, hydraulics, pneumatics, and propellers), and avionics components (electrical components, gyros, radar/communications, instruments, and electro-optics). It also provides engine support for commercial and military aircraft, including the CFM56-3, JT8D, F404, F100, T53, T55, Turbomeca Makila and Arriel engines.

Engineering & Materials Services (EMS)

ST Aerospace's Engineering & Materials Services (EMS) provides complex customised upgrades and support systems, including the Maintenance-By-the-Hour™ (MBHTM) programme, warehouse and materials management, Aircraft-On-Ground (AOG) spares and service support, aircraft parts trading, aircraft operating leases and OEM representation.

EMS's Engineering & Development Centre (EDC) has customised upgrades in avionics, structures, and systems for the F-16 Falcon, F-5 Tiger, A-4 Skyhawk, C-130, KC135 and the Super Puma. EDC's latest avionics upgrade is the Falcon ONE for the F-16 fighter aircraft.

In the commercial sector EDC has partnered with Boeing to engineer a solution for a

B757-200 Passenger-to-Freighter (PTF) conversion, and worked on the EC120, a programme for light helicopters with Eurocopter of France and China's CATIC.

ST Aerospace also offers Maintenance-By-the-Hour™ (MBHTM), an outsource option for customers that provides fixed-fee per hour service tailored to each customer's needs, backed by 24-hour inventory supply. Customers joining the programme in 2002 included Skynet (Ireland), Buzz (UK), and AirAsia (Asia).

EMS also operates as a single source component supplier ensuring customers receive top quality supplies and the assurance of materials support.

SINGAPORE TECHNOLOGIES ELECTRONICS (ST Elect)

ST Elect is electronics system houses in the Asia Pacific, serving customers in the commercial, industrial, defense and public services worldwide. It specializes in the design and delivery of proprietary electronics system solutions, and is a major producer of Large-Scale, Communications and Sensor, and Software Systems.

Communications and Sensor Systems

The Communications and Sensor Systems Group provides integrated communications systems ranging from complex electronic communications, to sensor and real-time software systems. Many of ST Elect's systems are deployed throughout society, serving commercial and industrial enterprises, to public safety and military and para-military forces.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
