Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Smurfit Kappa Group plc business.

About Smurfit Kappa Group plc

Smurfit Kappa Group plc, through its subsidiaries, manufactures, distributes, and sells containerboard, corrugated containers, and other paper-based packaging products in Europe and Latin America. The company's products include containerboard, corrugated containers and other paper-based packaging products such as solidboard and graphicboard.

Segments

The company's segments include Packaging and Specialties.

Packaging

The Packaging segment includes a system of mills and plants that produce a line of containerboard that is converted into corrugated containers. It includes integrated European paper and corrugated operations, as well as Latin American operations. European packaging operations consist of three kraftliner mills, in Sweden, France and Austria, which between them produced 1.5 million tonnes of brown and white kraftliner in 2008; a semi chemical fluting mill in Slovakia which produced 0.2 million tones of paper; and 15 recycled containerboard mills, which produced 3.0 million tonnes of paper

plus a number of recovered fibre collection facilities, a wood products business and wood procurement operations.

The company's European packaging operations also include: 111 corrugated plants in 22 countries in both Western and Eastern Europe, with combined production in 2008 of 4.5 million tonnes (8.2 billion square metres); 57 sheet plants in 15 countries with a combined production of 0.2 million tonnes (0.4 billion square metres) in 2008, 22 plants in 11 countries, which produce litho laminated corrugated products, preprint or display units; and various other small plants producing paper tubes, pallets, fulfilment activities and other packaging solutions.

Latin American operations consist of 11 paper mills in 4 countries (Colombia, Mexico, Venezuela and Argentina) producing containerboard, boxboard, sack paper and printing and writing paper, with a combined production of 1.0 million tonnes; 28 corrugated plants in 6 countries with a 2008 production of 0.8 million tonnes (1.2 billion square metres); 1 preprint facility; 5 paper sack converting plants in 4 countries; 3 folding carton plants in Mexico and Venezuela; 26 recovered fibre plants in 5 countries and forestry operations in Colombia and Venezuela. In 2008, Smurfit Kappa came up with an innovative, sustainable packaging solution for Toshiba Europe.

Specialties

The Specialties segment primarily consists of graphicboard and solidboard businesses, along with paper sack and bag-in-box operations.

Dispositions

In 2008, the company sold its principal associate Duropack AG to Constantia Packaging.

History

Smurfit Kappa Group plc was founded in 1934.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
