Abstracts

Softnet Technology Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Softnet Technology Corp. and its competitors. This provides our Clients with a clear understanding of Softnet Technology Corp. position in the Industry.

The report contains detailed information about Softnet Technology Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Softnet Technology Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Softnet Technology Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Softnet Technology Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Softnet Technology Corp. business.

About Softnet Technology Corp.

SoftNet Technology Corporation offers information technology consulting services and solutions to enterprise and service providers. The company focuses in providing technology infrastructure services with specific capabilities in Information Security, Network Economics, Internetworking, Network Management, IP Telephony, Storage, Application Performance and Data Center Migration/Consolidation.

The company provides the customer with a range of consulting, software solutions and recruiting services helping its customers plan, deploy, secure, and manage IT services and infrastructures enabling them to meet their short and long term business objectives.

The company's Network Economics practice area examines the client's network infrastructure from a business perspective and uses the assessment results to deliver a thorough analysis of the customer's network and current/future needs.

The company offers its services on a long- or short-term basis across all phases of the network life cycle. Its services are suited to clients having immediate business networking needs, as well as those customers who outsource or out-task all or a portion of their network infrastructure or operations.

Return on Invested Capital Analysis (ROIC)

The company's ROIC analysis is a tool which offers an in depth of the client's operations as it relates to aspects such as service delivery, partnerships, facilities, sales, marketing, operations, customer care, cost of equipment, and useful life. The costs and revenues associated with these parameters are integrated into a model that examines service mix and pricing of revenue, along with the Cost of Goods Sold (COGS), labor costs, depreciation and income tax costs. The result of this analysis enables the client to have an understanding of its operating margins on a particular mix of services and configuration of corporate assets. The second, parallel, part of the analysis focuses on the client's Return On Invested Capital (ROIC). ROIC analysis provided by SoftNet Technology Corp. provides its clients with the necessary tools and insight into their operation, whether they are service providers or large enterprises.

Network Cost Assessment and Cost-Optimized Network Design

The company works closely with the client to collect and synthesize the information required to detail the tasks and resources which are required to complete the main phases of the engagement: Comprehensive Enterprise Network Assessment, Comprehensive Enterprise Management Assessment, and Network Cost Assessment.

Cost Optimized Network Design: The primary deliverable associated with the discovery phase is a detailed scope and project plan document that defines precisely what would be required to conduct a network infrastructure and management assessment, including personnel and technical resources, and would describe a detailed project methodology for conducting the assessment. SoftNet Networking Technology's initial network assessment provides the client with an evaluation of the overall health of the network against industry best practices.

Business Continuity Services (BCP)

Business Continuity Services are scalable from the largest data center operation, to targeted business unit or critical service offering. BCP activities are focused on issues to prepare a business for unexpected interruptions, ensuring that they are able to support future business requirements, such as e-commerce, connecting to trading partners (extranets), and fulfilling regulatory and other industry/business requirements.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
