Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Sona Resources Corp. business.

About Sona Resources Corp.

Sona Resources Corp., an exploration company, engages in the exploration and development of mineral properties in Canada and the United States. The company primarily explores for gold.

Properties

Blackdome Gold Mine

The Blackdome Gold Mine is located approximately 250 kilometers north of Vancouver, 70 kilometers west northwest of the town of Clinton. The Blackdome Gold Mine is wholly owned by No. 75 Corporate Ventures Ltd., which in turn is wholly owned by the company. The property consists of 22 mineral claims, 10 crown-granted mineral claims, and 2 mining leases totaling 9,330 hectares.

Elizabeth Property

The company has an option agreement to purchase agreements for crown granted mineral claims known as the Elizabeth Property and for surrounding mineral claims known as the Blue Claims in the Lillooet Mining District, British Columbia, Canada. The

company also staked additional mineral claims. Collectively, the claims are referred to as the Elizabeth Project. The Elizabeth Property is a mid-stage exploration project located in southwestern British Columbia, in the Lillooet Mining District, approximately 30 kilometers northeast of the town of Goldbridge and the mining town of Bralorne. The property consists of four Crown grants and 12 mineral claims exceeding 11,000 hectares, and is situated along a tributary of the Yalakom River.

Blackdome South

The Blackdome South Project is a grassroots exploration project. This large land package consists of mineral claims of approximately 8,600 hectares contiguous to the southern boundary of the Blackdome Gold Mine, in the Clinton Mining Division of southwestern British Columbia. The company holds 100% interest in the property.

Montgolfier Project

The Montgolfier Project is located in northwestern Quebec, approximately 12 kilometers east of the commercially producing Casa Berardi Mine. The project comprises 127 staked claims and 100 designated map cell claims totaling 6,943 hectares. The company has an option to earn 100% interest in the property.

Golden Trend Project

The Golden Trend project is an early-stage exploration property located in northern Nevada. It lies within the highly prolific Battle Mountain–Eureka Trend in Eureka County, Nevada, approximately 480 kilometers northeast of Reno. Golden Trend consists of 111 unpatented mining claims.

Callaghan Project

The Callaghan Project is an early-stage exploration property located southeast of Mount Callaghan in Lander County, Nevada, approximately 32 kilometers northeast of Austin, the county seat, and approximately 450 kilometers northeast of Reno. The company has an option to purchase 100% of the property.

History

The company was founded in 1990. It was formerly known as J-Pacific Gold Inc. and changed its name to Sona Resources Corp. on January 26, 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
