The Sonova Holding AG financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Sonova Holding AG competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Sonova Holding AG business.

About Sonova Holding AG

Phonak Holding AG engages in the development, manufacture, distribution, and servicing of hearing systems and related products. The Phonak Group comprises two hearing instrument divisions, Phonak and Unitron Hearing, as well as Phonak Communications, a developer of wireless communication devices for both hearing instrument and other applications.

The company operates worldwide and distributes its products through its own distribution network in the major industrialized countries and through independent representatives in approximately 70 other countries. The company principally operates in North America, Europe, Switzerland, China, Canada, and the United States.

In 2004 the company acquired Viennatone Horgerate GmbH to join Phonak's existing Austrian retail organization Hansaton. In China, the Group establishes a new sales organization by integrating the former Phonak and Unitron Hearing agents to strengthen its presence in this important market. In Spring Phonak launched Valeo, the new digital product line in the mid-level segment. On the entry-level, Unitron Hearing introduces Breeze, a digital hearing system with conventional, trimmer-controlled fittings.

PRODUCTS

Hearing Instruments

Phonak develops hearing instruments for every degree of hearing loss, every preference and budget. Phonak provides high-tech solutions for children with hearing loss. The hearing instrument technologies, which are available from Phonak include Digital Technology, Programmable Technology, and Analog Technology.

The products offered through the company's digital technology include: Savia, Perseo, Claro, Valeo, miniValeo, Aero, Supero, and MAXX. The products offered through programmable technology include Astro, MicroZoom, Piconet2, SonoForte2, PowerZoom, and NovoForte. The products offered through its analog technology include Classica, PicoForte3, and SuperFront.

Wireless communication systems

Wireless communication systems (FM systems) from Phonak have been helping hearing-impaired people to gain and enjoy vital communication. Phonak HAS developed digital frequency synthesizer technology, which is a multi-frequency system brings a combination of flexibility and miniaturization to the learning environment.

SmartLink SX: SmartLink is a communication gateway to all situations where understanding perfectly, all of the time, is key. This innovation, SmartLink, meets the needs of people with hearing loss, allowing them to communicate effectively in all environments and to take advantage of all the communication tools available today.

Transmitters: SmartLink offers access to the communication possibilities of business life, Bluetooth link for mobile phones, hearing instrument remote control, improved FM functionality, etc.

SmartLink SX, the new benchmark in wireless communication, incorporates improved FM technology, a hearing instrument remote control, and a Bluetooth link for mobile phone use. It provides crystal clear sound through the improved three phase DSP processing package with Digital SuperZoom², Fine-scale Noise Canceler, and Digital Voice Enhancement.

Campus S - Campus S is flexible when it comes to multi-classroom applications. These and other useful features, such as the large-format LCD, the built-in cable rewind, the multifunctional microphone or the simplified power management make Campus S the

top transmitter in design, technology and convenience. It is used in all teaching environments, such as classrooms, excursions, guided tours, conferences, and meetings.

HandyMic TX3 - The microphone with a built-in transmitter is especially used for adults. The improved multi-microphone technology of the HandyMic combines omnidirectional, directional, and super-directional microphones with an FM transmitter. It can be set up directly in front of the sound source, slipped into the speaker's shirt pocket, or aimed at the speaker by hand. With an audio cable, the HandyMic can also be connected to a sound system. As with all other Phonak FM products, the HandyMic has a range of 7 to 15 meters (23 to 50 feet). It is used for business meetings, round-table discussions, family gatherings, in a car, on a nois

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
