The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Sony Financial Holdings Inc. business.

About Sony Financial Holdings Inc.

Sony Financial Holdings Inc., through its subsidiaries, engages in the life insurance, non-life insurance, and banking activities in Japan. The company's subsidiaries include Sony Life Insurance Co., Ltd.; Sony Assurance Inc.; and Sony Bank Inc.

Sony Life

Sony Life provides customers with a range of life insurance products and services. The number of policies in force by Sony Life was approximately 4.7 million. Sony Life offers a range of products to fulfill diverse customer requirements, death benefit, and other similar protection products. Sony Life established a 50–50 joint venture AEGON Sony Life Planning Co., Ltd. in preparation for establishing and commencing operation of a new life insurance company that develops individual annuity products for over-the-counter sale at banks, as well as through the Lifeplanner sales channel.

Sony Assurance

Sony Assurance sells automobile insurance and SURE medical and cancer insurance. It started selling overseas travel accident insurance in May 2009 and launched agency sales of pet insurance in January 2009 and cancer treatment insurance in June 2009.

Sony Assurance offers automobile insurance by using risk-segmented categories to account for each customer's driving characteristics—distance driven per year, reason for car use, car model, number of years since first registering car ownership, age, and type of driver's license. Sony Assurance also offers the original Oritemo Rider to provide indemnity coverage for policyholders who are injured or have personal belongings damaged after exiting their insured vehicles temporarily while out for a drive.

Sony Bank

Products and Services: Sony Bank is an Internet bank doing business solely through websites. These include a corporate site that makes information about the bank available, as well as service sites that customers use for their banking transactions. Its asset management products include Yen deposits (ordinary deposits, time deposits, and thrift saving deposits); foreign currency deposits (ordinary deposits, time deposits, and time deposits with special terms); foreign exchange margin trading; investment trusts; financial product intermediary services; insurance; loan products and credit cards; and asset management support tools.

Sony Bank Securities: Sony Bank Securities offers Sony Bank account holders equity and other securities trading services. Working with Sony Bank, Sony Bank Securities offers retail financial services to support customers looking for returns with a long-term perspective.

History

Sony Financial Holdings Inc. was founded in 1979.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
