The South Jersey Industries, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes South Jersey Industries, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of South Jersey Industries, Inc. business.

About South Jersey Industries, Inc.

South Jersey Industries, Inc., through its wholly owned subsidiaries, provides various energy related products and services.

Subsidiaries and Activities

South Jersey Gas Company (SJG)

SJG is an operating public utility company engaged in the purchase, transmission, and sale of natural gas for residential, commercial, and industrial use. SJG also sells natural gas and pipeline transportation capacity (off-system sales) on a wholesale basis to various customers on the interstate pipeline system and transports natural gas purchased directly from producers or suppliers to their customers.

SJG's service territory covers approximately 2,500 square miles in the southern part of New Jersey. It includes 112 municipalities throughout Atlantic, Cape May, Cumberland and Salem Counties, and portions of Burlington, Camden and Gloucester Counties. SJG serves majority of households within its territory with natural gas. SJG also serves southern New Jersey's diversified industrial base that includes processors of petroleum and agricultural products; chemical, glass and consumer goods manufacturers; and

high technology industrial parks.

As of December 31, 2009, SJG served a total of 343,566 residential, commercial, and industrial customers in southern New Jersey. SJG makes wholesale gas sales to gas marketers for resale and ultimate delivery to end users. SJG has direct connections to the interstate natural gas pipeline systems of both Transcontinental Gas Pipe Line Company, LLC (Transco) and Columbia Gas Transmission, LLC (Columbia).

South Jersey Energy Solutions, LLC

The company has established South Jersey Energy Solutions, LLC (SJES) as a direct subsidiary for the purpose of serving as a holding company for its non-utility businesses. The following businesses are wholly owned subsidiaries of SJES:

South Jersey Resources Group, LLC (SJRG): SJRG markets natural gas storage, commodity, and transportation assets on a wholesale basis. Customers include energy marketers, electric and gas utilities, and natural gas producers. SJRG's marketing activities occur mainly in the mid-Atlantic and southern regions of the country. SJRG also conducts price risk management activities by entering into various physical and financial transactions, including forward contracts, swap agreements, option contracts, and futures contracts.

Marina Energy, LLC (Marina): Marina develops and operates energy-related projects. Marina's major operating project provides cooling, heating, and emergency power to the Borgata Hotel Casino & Spa in Atlantic City, New Jersey. Marina also has a 50% equity interest in LVE Energy Partners, LLC, which has entered into a contract to design, build, own, and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada.

Marina's other projects include 51% equity interests in AC Landfill Energy, LLC (ACLE) and WC Landfill Energy, LLC (WCLE), which operate a total of 9,200 kilowatts of landfill gas-fired electric production facilities, and 50% equity interests in various partnerships that primarily operate landfill gas-fired electric production facilities and solar projects.

South Jersey Energy Company (SJE): SJE provides services for the acquisition and transportation of natural gas and electricity for retail end users and markets total energy management services. As of December 31, 2009, SJE marketed natural gas and electricity to approximately 13,600 customers. Majority of customers served by SJE are located within southern New Jersey, northwestern Pennsylvania, and New England.

South Jersey Energy Service Plus, LLC (SJESP): SJESP installs and services residential and light commercial HVAC systems, provides plumbing services, and services appliances via the sale of appliance service programs, as well as on a time and materials basis. SJESP serves southern New Jersey. As of December 31, 2009, SJESP had approximately 67,000 service contract customers, representing approximately 157,000 service contracts for the repair and maintenance of major appliances, such as house heaters, water heaters, gas ranges, and electric central air conditioning units.

Other

SJI Services, LLC provides services, such as information technology, human resources, government relations, corporate communications, materials purchasing, fleet management, and insurance to the company and its other subsidiaries.

Energy & Minerals, Inc. (EMI) principally manages liabilities associated with discontinued operations of nonutility subsidiaries.

The company also has a 50% joint venture investment with Conectiv Solutions, LLC in Millennium Account Services, LLC (Millennium). Millennium provides meter reading services to SJG and Atlantic City Electric Company in southern New Jersey.

History

South Jersey Industries, Inc. was founded in 1910.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
