The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Spartech Corp. business.

About Spartech Corp.

Spartech Corporation, together with its subsidiaries, is an intermediary processor of engineered thermoplastics, polymeric compounds, and concentrates. The company converts base polymers or resins purchased from commodity suppliers into extruded plastic sheet and rollstock, thermoformed packaging, specialty film laminates, acrylic products, specialty plastic alloys, color concentrates, and blended resin compounds.

Segments

The company operates in three segments: Custom Sheet and Rollstock, Packaging Technologies, and Color and Specialty Compounds.

Custom Sheet and Rollstock

The Custom Sheet and Rollstock segment primarily manufactures plastic sheet, custom rollstock, laminates, and cell cast acrylic. This segment produces and distributes its products from facilities in the United States, Canada, and Mexico. Finished products are formed by customers that use plastic components in their products. The company's custom sheet and rollstock is utilized in several end markets, including packaging, transportation, building and construction, recreation and leisure, electronics and

appliances, sign and advertising, aerospace, and various other end markets.

Packaging Technologies

The Packaging Technologies segment manufactures custom-designed plastic packages and custom rollstock primarily used in the food and consumer product markets.

Color and Specialty Compounds

This segment manufactures custom-designed plastic alloys, compounds, color concentrates, and calendered film for use by a large group of manufacturing customers servicing the transportation (mostly automotive), building and construction, food, medical and industrial packaging, lawn and garden, electronics and appliances, and various other end markets. This segment also uses colorants, mineral and glass reinforcements and other additives to impart specific performance and appearance characteristics to the compounds. This segment produces and distributes its products from facilities in the United States, Canada, Mexico, and France.

Customers

The company serves companies operating in the following industries: packaging, building and construction, transportation, recreation and leisure, sign and advertising, appliance and electronics, and lawn and garden.

Significant Events

The company, in 2009, sold its wheels and profiles businesses and closed and liquidated three businesses including a manufacturer of boat components sold to the marine market, and one compounding and one sheet business which serviced single customers.

History

Spartech Corporation was founded in 1947.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
