term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Sparton Resources Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Sparton Resources Inc. business.

### **About Sparton Resources Inc.**

Sparton Resources Inc., a development stage company, engages in the exploration and development of mineral properties in China, Canada, the United States, and Mexico.

#### Properties

The company's oil and gas properties in Canada consist of the following:

**Chebucto SDL:** The company has a 12.5% working interest in the Chebucto Significant Discovery Licence 2286 (SDL 2286). The Chebucto gas field is located approximately 40 kilometers southeast of Sable Island, which is approximately 300 km southeast of Halifax, Nova Scotia, Canada.

**Luxi Gold Project, China:** The company, in 2003, acquired the right to participate, with an 80% interest, in a project to explore certain mineral licenses in the Yunnan Province, China.

**Uranium ARCN Project, China:** The company incorporated a 100% owned BVI subsidiary Sparton Energy Inc., in January 2008, to hold the company's interests in the ARCN project. In January 2008, Sparton Energy Inc. entered into a Chinese-Foreign

Cooperative Joint Venture Contract with BJH and ARCN to form a joint venture Yunnan Sparton New Environ-tech Consulting Co. Ltd.

208 Project, China: The company, in December 2006, signed a letter of intent for a co-operation agreement with Brigade 208 of China National Nuclear Corporation (208) to carry out a due diligence evaluation of 208's gold production and exploration project in the Wu La Te Zhong Qi area of Inner Mongolia, China. 208 holds certain exploration licenses and a mining license for the Tu Gu Ri Ge Gold mine. The company would obtain up to a 30% equity interest in the Tu Gu Ri Ge Gold mine, and up to a 60% interest in the joint venture.

Whiskey Project, Canada: The company's wholly owned 'Whiskey' copper-uranium property is an early stage project located in central New Brunswick.

Sierra Rosario Project, Mexico: International Northair Mines Ltd. (Northair) and the company have signed a binding option agreement whereby the company may earn a 51% interest in Northair's Sierra Rosario project. As of December 31, 2008, the company had earned the 51% joint venture with Northair.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
