## Abstracts

Specialty Chemical Resources, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Specialty Chemical Resources, Inc. and its competitors. This provides our Clients with a clear understanding of Specialty Chemical Resources, Inc. position in the Industry.

The report contains detailed information about Specialty Chemical Resources, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Specialty Chemical Resources, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Specialty Chemical Resources, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Specialty Chemical Resources, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Specialty Chemical Resources, Inc. business.

### **About Specialty Chemical Resources, Inc.**

Specialty Chemical Resources Inc was incorporated in Delaware in 1982 for the purpose of operating family oriented restaurants and entertainment centers. Aerosol Systems, Inc. (ASI) was merged into Specialty Chemical Resources, Inc in 1992.

Specialty Chemical mixes chemicals into formulas and packages them primarily in aerosol cans, although some formulas are packaged in quart, gallon, 5-gallon and 55-gallon drums. These chemical products are then sold into the automotive service, manufacturing plant maintenance and cleaning service markets. Typically, when Specialty Chemical develops a formula, it retains the right to sell that formula to any of its customers. Specialty Chemical produces and sells over 850 different formulas. These formulas represent know-how of Specialty Chemical developed through the skill and expertise of its employees. These formulas are not generally patented.

Specialty Chemical's products include cleaners, sealants, lubricants, waxes, adhesives, paints, coatings, degreasers, polishes, static electricity reducing sprays and tire inflators. In addition, Specialty Chemical produces and sells its own branded products under the Taylor Made Products (TMP) and Hysan/Aerosol Maintenance Products (Hysan/AMP) names.

Products: Aerosol containers are a convenient, effective and efficient way to deliver thousands of products. The containers, 3.1 billion of, which were sold in the United States in 1997, are generally made of steel or aluminum and can be recycled. Specialty Chemical's aerosol products generally have used compressed gases, such as carbon dioxide and nitrogen, and liquified gases, such as propane and butane, as propellants. Specialty Chemical's aerosol containers generally range from 4 ounces to 24 ounces in capacity. Specialty Chemical combines its chemical formulation, an appropriate propellant, dip tube, valve, actuator, cap and the aerosol container to produce the final product.

Products developed by Specialty Chemical for the automotive service and industrial maintenance markets include cleaners, degreasers, lubricants and paints. The Company has also developed specialized products for the automotive service market, such as its patented non-flammable tire inflator, carburetor, brake and choke cleaners, gasket and trim adhesives, undercoatings, silicones, belt dressings, and fabric protectors. Specialized products for the industrial maintenance market include molybdenum lubricants, food-grade lubricants and cleaners, release agents and protectors for injection and cast molding applications as well as EPA registered disinfectants and deodorants.

Specialty Chemical has developed a number of products using barrier packages. In a typical aerosol, the propellant and product are mixed and released from the can as a foam or spray. In a barrier package, the product is separated from the propellant by a liner (a can within a can) and only the product, and not the propellant, is released.

Specialty Chemical also produces and sells several products under its own brand names. The Taylor Made Products or TMP brand, which includes paints, cleaners, lubricants and degreasers, is sold principally to the automotive do-it-yourself market through chain store merchandisers. The Aerosol Maintenance Products or AMP and Hysan brands are sold principally to janitorial and sanitation supply distributors and include cleaning, deodorizing, and disinfectant products.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
