Abstracts

Spectrum Control Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Spectrum Control Inc. and its competitors. This provides our Clients with a clear understanding of Spectrum Control Inc. position in the Industry.

The report contains detailed information about Spectrum Control Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Spectrum Control Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Spectrum Control Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Spectrum Control Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Spectrum Control Inc. business.

About Spectrum Control Inc.

Spectrum Control, Inc. engages in the design, development, and manufacture of custom electronic components and systems.

Segments

The company's operations are conducted in four segments: Advanced Specialty Products; Microwave Components and Systems; Power Management Systems; and Sensors and Controls.

The Advanced Specialty Products Business designs and manufactures a range of products including antennas, specialty connectors, advanced ceramics, and electromagnetic interference (EMI) filters, and interconnects.

The Microwave Components and Systems Business designs and manufactures microwave filters and components, high power amplifiers, oscillators, synthesizers, switched filter banks, and related systems and integrated assemblies.

The Power Management Systems Business designs and manufactures custom AC and DC power distribution units, power outlet strips, power monitoring equipment, and its

Smart Start power management systems.

The Sensors and Controls Business designs and manufactures rotary and linear precision sensors, temperature sensing probes, thermistors, resistance temperature detector sensors, and related assemblies.

Products

ADVANCED SPECIALTY PRODUCTS

The company offers products for a range of components and assemblies, including antennas, unfiltered interconnects, cable assemblies, specialty ceramics, and film modules. Its advanced specialty products provide solutions for military and aerospace applications, such as weapons guidance systems, missile defense, radios, secure communications, aircraft, and military vehicles. Its communications equipment applications include base stations, switching equipment, GPS, and optical networks. In addition, its advanced specialty products are utilized within commercial aircraft, industrial controls, instrumentation, medical, consumer, and automotive markets.

Antenna Assemblies: The company offers patch antennas; microstrip antennas; slot antennas; and arrays and assemblies.

Specialty Connectors and Harnessing: The company offers circular connectors; audio connectors; glass sealed connectors; and value added terminations, cables, and harnesses.

Emi Coaxial Filters and Interconnects: The company offers resin and hermetically sealed filters; motor-line feed through filters; high current and high voltage filters; miniature hermetically sealed and surface mount filters; filter plates and terminal blocks; d-sub and combo filtered connectors; ribbon and datacomm connectors; and USB filtered and ESD protected connectors.

Power Filters and Film Modules: The company offers commercial power filters; military and aerospace power filters; power entry modules; film feed through filters; and film modules.

Advanced Ceramics: The company offers structural ceramics; capacitor arrays; planar capacitors; discoidal and tubular capacitors; and thick and thin film.

MICROWAVE COMPONENTS AND SYSTEMS

The company designs and manufactures a range of RF and microwave products. These products are primarily sold into military/defense markets for applications in communication jamming systems, radar systems, countermeasures, radio, electronic warfare, and weapons guidance systems. Wireless commercial applications for its microwave components and systems include base stations and towers, WiFi, HDTV and CATV, as well as medical imaging equipment.

RF and Microwave Amplifiers: The company offers ultra low phase noise; medium power broadband models; high reverse isolation AMPS; and high linearity designs.

RF and Microwave Mixers: The company offers broadband triple balanced models; high isolation double balanced designs; multi-octave doublers; and high image suppression models.

Frequency Control Products: The company offers low phase noise voltage controlled oscillators; high frequency dielectric resonator oscillators; multi-throw switches; and low phase noise synthesizers.

RF and Microwave Filters: The company offers high selectivity cavity filters; tubular filters; low profile lumped element designs; ceramic filters; and multi-channel switched filter banks.

Integrated RF and Microwave Solutions: The company offers integrated microwave assemblies

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
