## Abstracts

Spindletop Oil & Gas Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Spindletop Oil & Gas Co. and its competitors. This provides our Clients with a clear understanding of Spindletop Oil & Gas Co. position in the [Energy](#) Industry.

The report contains detailed information about Spindletop Oil & Gas Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Spindletop Oil & Gas Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Spindletop Oil & Gas Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Spindletop Oil & Gas Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Spindletop Oil & Gas Co. business.

### **About Spindletop Oil & Gas Co.**

Spindletop Oil & Gas Co., an independent oil and gas company, engages in the exploration, development, production, and acquisition of oil and natural gas; and the rental of oilfield equipment.

The company also engages in the gathering and marketing of natural gas. It engages in commercial real estate leasing through the acquisition and partial occupancy of its corporate headquarters office building.

In addition, the company, through its wholly owned subsidiary, Prairie Pipeline Co. (PPC), owns approximately 26.1 miles of pipelines located in Texas, which are used for the gathering of natural gas. These gathering lines are located in the Fort Worth Basin and are being utilized to transport the company's natural gas, as well as natural gas produced by third parties.

### **Products**

The principal products marketed by the company are crude oil and natural gas, which are sold to major oil and gas companies, brokers, pipelines and distributors, and oil and gas properties, which are acquired and sold to oil and gas development entities.

The company owns land and a two story commercial office building in Dallas, Texas, which it uses as its principal headquarters office. The company leases the remainder of the building to non-related third party commercial tenants.

The company also engages in commercial real estate leasing through the acquisition and partial occupancy of its corporate headquarters office building. It occupies approximately 10,317 rentable square feet of the building as its primary office headquarters, and leases the remaining space in the building to non-related third party commercial tenants.

### Project Significant Areas

The company owns various interests in wells located in 15 states. Its operations are located in six states, including Texas, Oklahoma, New Mexico, Louisiana, Alabama, and Arkansas. It operates a majority of its projects through the drilling and production phases. The company holds approximately 86,448 gross acres under lease in 15 states. The majority of the leases are held by production.

### Joint Drilling Development of North Texas Barnett Shale Leasehold

The company, along with Giant Energy Corp., has a Farmout and Exploration Agreement with Williams Production-Gulf Coast Company, L.P.

During 2009, the Olex U.S. #8 well, located on the company's Krum SW Block in Denton Co., Texas was completed in the Barnett Shale Formation. The company owns a 52.5% working interest in this well. The company owns 91% interest in the Poston #1 well.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
