Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SRA International Inc. business.

About SRA International Inc.

SRA International, Inc. provides technology and strategic consulting services and solutions to clients in national security, civil government, and global health.

Services

The company offers a range of technology and strategic consulting services spanning the IT life cycle, including strategic consulting; systems design, development, and integration; cyber security and information assurance; outsourcing and managed services; and business solutions.

Strategic Consulting: The company helps clients formulate business and execution plans. It assesses operations, develops targeted strategies and plans for improvement, defines key priorities and accountabilities, and designs enterprise architectures that capitalize on client investments in legacy systems.

Systems Design, Development, and Integration: The company's services include project management, systems design, network and systems integration, data analysis and integration, security engineering, software development, database design and

development, and independent test and evaluation. The company analyzes system concepts, assesses data and information needs, defines requirements, develops operational prototypes, and integrates mission-critical systems and solutions that comply with a client's enterprise architecture.

Cyber Security and Information Assurance: The company offers a multi-disciplined approach to cyber security and information assurance based on a combination of expertise on the offensive and defensive sides of the cyber threat. Its suite of solutions includes security architecture, secure systems integration, cyber security operations, information operations, compliance, privacy, and training services. It has deployed these offerings for various customers in the national security and civilian agency markets, both as stand-alone cyber security contracts and as elements of infrastructure support contracts.

Outsourcing and Managed Services: The company partners with clients to consolidate and modernize existing infrastructures. It also supports clients with operations management services, referred to as co-sourcing. Based on client needs, the company may oversee their technical infrastructure, manage their applications and networks, or operate their business processes in accordance with service-level agreements. Through infrastructure support contracts, the company also purchases third-party hardware and/or software for integration into the network or application systems the company provides.

Business Solutions: The company has developed tailored solutions that focus on specific business requirements that are common to its clients. These business solutions generally apply to clients within each of its target markets. The company's core business solutions include text and data mining; enterprise resource planning; business intelligence; command and control systems; contingency and disaster planning; enterprise architecture and portfolio management; environmental support services; identity management; information sharing and knowledge management; infrastructure modernization; service-oriented architecture; training, modeling, and simulation; clinical research outsourcing, regulatory consulting and data management; and wireless integration services.

Products

In connection with its service offerings, the company also develops and sells proprietary software and hardware products in each of its markets. In 2008, the company acquired Era Systems Corporation (Era) and Interface & Control Systems (ICS).

Software: The company's software products provide data and text mining solutions. ORIONMagic helps clients cull through gigabytes of information, store the relevant pieces, and analytically search each piece. NetOwl software applies advanced natural language understanding technologies to English, Arabic, Chinese, Farsi, French, Korean, and Spanish text to extract content. The company's GangNet database system is a browser-based investigative, analysis, and statistical resource used by law enforcement officials to record and track gang members and their activities.

The company's software products and engineering services offer real-time, emb

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
