The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SSGI, Inc. business.

### **About SSGI, Inc.**

SSGI, Inc., a petroleum contractor, providing construction and environmental compliance services for its government and private sector clients in Florida. The company also provides general contractor services for commercial construction projects.

### **Markets**

**Insurance Restoration:** The company is a contractor for insurance companies and is qualified for residential, commercial, and industrial projects. It offer the insured, adjuster, and carrier a single source for mold remediation, flood mitigation, fire restoration, emergency services, contents cleaning, and inventory compilation services. It is certified as a CIEC (certified indoor environmental consultant) and as a CMRS (certified mold remediation supervisor).

**Petroleum Contracting:** Petroleum contracting involves the removal and replacement of obsolete single walled tanks, piping and the related clean-up on any petroleum dispensing and/or storage sites. These sites can be gas stations, factories, citrus farms or multi faceted industrial facilities. The company offers an alternative to full tank replacement by utilizing the Xerxes secondary containment system. It has entered into an agreement with Tank Tech, Inc. (Tank Tech), under which it has the right to use its

proprietary method of relining existing underground storage tanks.

**Commercial/Retail Construction:** The company, as a full service general contractor, provides design/build and construction services for commercial, industrial, and retail customers throughout Florida. It provides construction management services for various customers who require new construction, as well as tenant improvements. It provides the following: managing the sub-contractor bidding process and subsequent contracting; constructions permit processing and buildings code compliance; design structure and plans; and erection of building, landscaping, and final inspection with local authorities

### Acquisitions

In May 2010, the company acquired the B&M Construction Co., Inc., a construction company operating in the Southeastern United States, which specializes in the design, construction, and maintenance of retail petroleum facilities.

### History

SSGI, Inc. was founded in 2001.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
