## Abstracts

St Andrew Goldfields Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between St Andrew Goldfields Ltd. and its competitors. This provides our Clients with a clear understanding of St Andrew Goldfields Ltd. position in the Industry.

The report contains detailed information about St Andrew Goldfields Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for St Andrew Goldfields Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The St Andrew Goldfields Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes St Andrew Goldfields Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of St Andrew Goldfields Ltd. business.

### **About St Andrew Goldfields Ltd.**

St Andrew Goldfields, Ltd. engages in the mining and exploration of gold. The company focuses on exploration, development and mining operations in major gold mining regions worldwide, including, the Timmins mining camp in Ontario, Canada; the Eskay Creek mining camp in British Columbia, Canada; the Kuskokwin-Tintina mining belt in Alaska, U.S.A.; and the Coromandel/Central Volcanic Region (North Island) and the Otago Region (South Island) in New Zealand.

#### Properties

##### The Timmins Properties

St Andrew's Timmins properties are centrally located in the Abitibi greenstone belt in the Superior Province of the Canadian Shield.

**Stock Gold Complex:** The Stock Gold Complex consists of the following four areas: the Clavos Project, the Stock Mine and Gold Mill, the Taylor Project and the Hislop Property.

The Clavos Project is located approximately 46 kilometres northeast of Timmins and 10

kilometres by haul road northwest of the Stock Mine and consists of 50 leased or patented claims covering 1,132 hectares.

The Stock Mine and related gold mill is located approximately 46 kilometres by road east of Timmins, Ontario, 1.6 kilometres north of Highway 101 and is accessible by highway. The Stock Mine property consists of 6 wholly-owned patented claims, 10 mining leases and 1 mineral lease covering 921 hectares located adjacent to the Stock Mine gold mill.

The Taylor property consists of 28 wholly-owned patented claims, leases and mineral claims in the south-central part of Taylor Township covering 1542 hectares. The property is located 53 kilometres east of Timmins, Ontario. The property includes two near surface gold deposits, the Shoot Zone and the Shaft Zone and the deeper West Porphyry Zone.

The Hislop Property consists of approximately 24 leased or patented claims in Hislop and Guibord Townships totaling approximately 571 hectares and is located approximately 85 kilometres by road east of Timmins, Ontario or 44 kilometres by road east of the Stock Mill.

#### Central Timmins Exploration Properties

The company's Central Timmins exploration properties are 'brownfields' (near historic or existing mining sites) exploration properties which extend across eight townships from German Township to Hislop Township, and cover 11,439 hectares over a 25 kilometre strike length trend from west to east. The properties are located between 35 and 80 kilometres east of Timmins, Ontario, in close proximity to the PDFZ and centered by the Stock Mine.

#### East Timmins Exploration Properties

The company's East Timmins exploration properties, known as the 'Golden Reward Project', are 'greenfield' (early stage) exploration properties which extend across ten townships east of Matheson, Ontario from Guibord Township to Harker Township. The properties, located between 80 and 120 kilometres east of Timmins, Ontario and 65 kilometres east of the Stock Mill and cover approximately 26,000 hectares.

#### Holloway-Holt Gold Mine

The Holloway-Holt property is located at the eastern end of St Andrew's extensive land package in the Timmins Mining Camp, northeastern Ontario. The Holloway-Holt property package includes an irregularly shaped, east-west elongate assemblage of claims, patents, and mining leases that straddles Ontario Provincial Highway 101 East for about 40 kilometres beginning east of Matheson in Michaud and McCool Townships and extending into Stroughton and Marriott Townships on the Québec border. The Holloway-Holt Gold Mine is located approximately 45 kilometres northeast of Kirkland Lake and 52 kilometres east of Matheson, Ontario.

The Holloway-Holt land package comprises 48 separate property elements totaling 838 claims distributed as 341 mineral claims, 219 leased claims and 278 patented claims. The aggregate area is 15,172 hectares (approximately 37,000 acres).

The Aquarius Deposit is located approximately 38 kilometres by road east of Timmins. The property consists of 9 mining leases, 41 patented and 35 unpatented claims covering 5,341 hectares. The site lies within the eastern boundary of the City of Timmins Municipal limits.

The Nixon Fork Property is located approximately 56 km northeast of McGrath in west central Alaska, and consists of 95 unpatented federal claims, 15 federal placer claims and 48 state mining claims, overlapping the federal claims, in the Kuskokwim-Tintina Mining Belt. 33 of the federal claims are located on land administered by a native corporation that obtained the land through the Alaska Native Claims Settlement Act.

The company's Eskay Creek mineral properties cover approximately 53,000 hectares and are located approximately 70 kilometres northwest of Stewart, British Columbia.

The company owns an approximate 50.2% controlling interest in Glass Earth, a mineral exploration company which has exploration properties on the North and South Islands of New Zealand.

#### Other Exploration Properties

##### The Beardmore-Geraldton Mining Camp

The company's Québec-Sturgeon River mine property consists of 35 contiguous leased mining claims in the Beardmore district in northern Ontario. The property covers an area of approximately 657 hectares and includes the Sturgeon River gold mine.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
