Abstracts

St. Jude Medical Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between St. Jude Medical Inc. and its competitors. This provides our Clients with a clear understanding of St. Jude Medical Inc. position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about St. Jude Medical Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for St. Jude Medical Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The St. Jude Medical Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes St. Jude Medical Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of St. Jude Medical Inc. business.

About St. Jude Medical Inc.

St. Jude Medical Inc. develops, manufactures, and distributes cardiovascular medical devices for the global cardiac rhythm management, cardiology, and cardiac surgery and atrial fibrillation therapy areas and neurostimulation medical devices for the management of chronic pain.

Segments

The company's four segments are Cardiac Rhythm Management (CRM), Cardiovascular (CV), Atrial Fibrillation (AF), and Neuromodulation (NMD).

The CV operating segment focuses on both the cardiology and cardiac surgery therapy areas. The company's principal products in each operating segment are as follows: CRM –tachycardia implantable cardioverter defibrillator systems (ICDs) and bradycardia pacemaker systems (pacemakers); CV – vascular closure devices, heart valve replacement and repair products and pressure measurement guidewires; AF – electrophysiology (EP) introducers and catheters, cardiac mapping, navigation and recording systems and ablation systems; and NMD – neurostimulation devices. The principal geographic markets for its products are the United States, Europe, Japan, and the Asia Pacific.

Principal Products

Cardiac Rhythm Management (CRM): CRM focuses on the research, development, and manufacture of products for cardiac arrhythmias, or irregular heart beats. In 2009, the company introduced multiple new products, including ICDs to provide life-saving therapy to patients suffering from lethal heart conditions, such as sudden cardiac arrest; cardiac resynchronization therapy (CRT) devices to save and improve the lives of heart failure (HF) patients; pacemakers to help people whose hearts beat too slowly or who suffer from other cardiac arrhythmias; and leads (wires that connect its devices to the heart) to carry electrical impulses to the heart and provide information to the device from the heart. CRM also develops and markets programmers and remote monitoring equipment that are used by physicians and healthcare professionals to program and analyze data from its devices for the management of their patients.

The company's ICDs and cardiac resynchronization therapy defibrillator (CRT-D) devices treat patients with hearts that beat inappropriately fast, a condition known as tachycardia. ICDs monitor the heartbeat and deliver high energy electrical impulses, or 'shocks,' to terminate ventricular tachycardia (VT) and ventricular fibrillation (VF). The SJ4 connector system, which includes the Durata SJ4 defibrillation lead and the Current ICD or Promote CRT-D families, reduces the procedure time, and volume of leads implanted in the chest cavity.

The company's Current Accel, Promote Accel, and AnalyST Accel devices are designed to adjust settings automatically to further improve patient safety and minimize scheduled patient follow-ups. In addition, the AnalyST Accel devices represent its second generation ICD devices capable of continuously monitoring the electrical charges between heartbeats, providing physicians insight into clinical events to help improve patient management.

In addition, its product portfolio includes the Current RF (radio frequency) VR/DR (single chamber/dual chamber) ICDs and Promote RF CRT-D. Other ICD offerings include the Epic II+ DR and high energy Atlas II+ DR and Atlas II VR/DR ICDs that offer its vibratory patient alert feature. Other CRT-D product offerings include the Epic II HF and high energy Atlas II HF CRT-Ds.

The St. Jude Medical QuickOpt Timing Cycle Optimization technology provides for automatic optimized ventricle to ventricle (V-V) and atria to ventricle (A-V) timing in St. Jude Medical CRT-Ds and dual-chamber ICDs.

The company's ICDs are used with the single- and dual-shock electrode transvenous defibrillation leads. The company's ICD lead offerings include the Durata SJ4 and Durata high voltage lead, which features a soft silicone tip and curved right-ventricular (RV) coil. The Riata leads are a family of small-diameter, steroid-eluting, active, or passive fixation defibrillation leads. The company also provides additional tools for placement of LV leads that include the CPS Direct, CPS Aim, CPS Luminary, CPS Duo, CPS Courier guidewires, and the CPS Venture wire control

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
