StanCorp Real Estate, LLC is a property management company that owns and manages the company's Hillsboro, Oregon home office properties and other properties and also manages its Portland, Oregon home office properties.

Segments

The company operates through two segments, Insurance Services and Asset Management.

Insurance Services Segment

The Insurance Services segment sells group and individual disability insurance, group life and AD&D insurance, group dental and group vision insurance products and absence management services to individuals and employer groups ranging in size from 2 lives to approximately 619,000 lives. The company has approximately 30,000 group insurance policies in force. Through its insurance subsidiaries, the company has the authority to underwrite insurance products in all 50 states.

The company's group insurance products are sold by sales representatives through independent employee benefit brokers and consultants. Its arrangements with brokers include compensation established at the time of sale (commissions or fees), and, in some situations, also include compensation related to the overall performance of a block of business (performance related compensation). Group long term disability insurance provides partial replacement of earnings to insured employees who become disabled for extended periods of time.

The company's basic long term disability product covers disabilities that occur during the policy period at both work and elsewhere. Group life insurance products provide coverage to insured employees for a specified period and have no cash value (amount of cash available to an insured employee on the surrender of, or withdrawal from, the life insurance policy). Coverage is offered to insured employees and their dependents. AD&D insurance is usually provided in conjunction with group life insurance, and is payable after the accidental death or dismemberment of the insured in an amount based on the face amount of the policy or dismemberment schedule.

The company's basic short term disability products generally cover only disabilities occurring outside of work. Short term disability insurance generally requires a short waiting period, ranging from 1 to 30 days, before an insured employee may receive benefits, with maximum benefit periods generally not exceeding 26 weeks. Group short term disability benefits may also be reduced by other income, suc

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
