## Abstracts

Stem Cell Innovations, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Stem Cell Innovations, Inc. and its competitors. This provides our Clients with a clear understanding of Stem Cell Innovations, Inc. position in the Industry.

The report contains detailed information about Stem Cell Innovations, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Stem Cell Innovations, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Stem Cell Innovations, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Stem Cell Innovations, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Stem Cell Innovations, Inc. business.

### **About Stem Cell Innovations, Inc.**

Stem Cell Innovations, Inc., a cell biology company, engages in the development and production of its pluripotent stem cells in the United States. The company utilizes its proprietary C3A human liver cell line in the field of drug discovery and toxicology testing. These human cell-based disease models create a platform for the discovery, testing, and development of various therapeutic modalities, including small molecules, cell-based therapeutics, small interfering RNAs, and antibodies.

#### **ACTIVTox and PREDICTIVTox - Drug Discovery and In vitro toxicology Systems**

ACTIVTox consists of the company's patented human liver cell line, C3A, paired with a series of in vitro toxicity kits to measure different aspects of liver toxicity. Together, the cells and tests provide information relevant to human liver toxicity which can be related to the structure of the molecules. PREDICTIVTox is a database of information from compounds, screened in the various assays under standardized conditions. The combined use of ACTIVTox and PREDICTIVTox allows chemists to organize and view the data in such a way as to make structural decisions about the molecules.

The company designs ACTIVTox products for industrial researchers who require knowledge of the interactions of their compounds with the human liver to assess their

safety and effectiveness. These are primarily drug discovery and development groups in major pharmaceutical companies, biotechnology companies, smaller pharmaceutical companies, and companies in the food supplement, nutraceutical and chemicals businesses.

**Competition:** The company's competitors include Multicell Technologies; Gentest division, Becton Dickinson; and In Vitro Technologies.

### The TPro System, Human Serum Protein Production

The company produces highly purified, human serum proteins that are chemically identical to the protein found in human blood but guaranteed pathogen free. The proteins to be harvested and purified include factor VIII, for hemophilia A, and factor IX, for hemophilia B. The company's C3A cell line is a human liver line and naturally produces all of these proteins. The TPro System, comprising the C3A cells, specialized cell culture medium and conditions, provides a pathogen free, controlled and economical source of these human proteins.

**Competition:** The company's competitors include ZLB-Behring, Baxter Healthcare, Bayer Corporation, and Wyeth.

### The Artificial Liver

The Artificial Liver consists of approximately 200 grams of liver cells cultured in a hollow fiber device identical to those used for hemodialysis. Each device contributes approximately 20% of adult liver function. The device would be connected to the blood stream of the patient as is done in standard hemodialysis.

**Competition:** The company's competitors include Vital Therapies, Vesta Therapeutics, CELLLECT Bio, Hemocleanse, and Multicell Technologies.

### The C3A Cell Line

The biological component of the company's initial products is the human hepatocyte cell line C3A. C3A was established from a human hepatoblastoma and selected for adult liver-specific function. The company has exclusive, world-wide licenses to the use of C3A for in vitro toxicology applications, for protein production and research applications.

**Competition:** The company's competitors include the University of Wisconsin (WiCell),

Geron, Inc., and Johns Hopkins University.

## History

Stem Cell Innovations, Inc. was incorporated in 1980.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
