## **Abstracts**

Stericycle, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Stericycle, Inc. and its competitors. This provides our Clients with a clear understanding of Stericycle, Inc. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Stericycle, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Stericycle, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Stericycle, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Stericycle, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Stericycle, Inc. business.

### **About Stericycle, Inc.**

Stericycle, Inc., together with its subsidiaries, provides regulated waste management and related services in the United States, Canada, Argentina, Chile, Mexico, Ireland, Portugal, Romania, and the United Kingdom.

For large-quantity generators of regulated waste, such as hospitals and for pharmaceutical companies and distributors, the company offer: regulated waste management services; Bio Systems sharps management services to reduce the risk of needle sticks; various products and services for infection control; and regulated returns management services for expired or recalled products.

For small-quantity generators of regulated waste, such as doctors' offices and for retail pharmacies, the company offer: regulated waste management services; Steri-Safe Occupational Safety and Health Act (OSHA) and Health Insurance Portability and Accountability Act (HIPAA) compliance programs; various products and services for infection control; and regulated returns management services for expired or recalled products.

The company's national networks include a total of 113 processing or combined processing and collection sites and 135 additional transfer, collection or combined

transfer and collection sites. The company's regulated waste processing technologies include autoclaving, its proprietary electro-thermal-deactivation system (ETD), chemical treatment and incineration. The company serves approximately 459,200 customers worldwide, of which approximately 11,300 are hospitals, blood banks, and pharmaceutical manufacturers, and approximately 447,900 are small-quantity generators, such as outpatient clinics, medical and dental offices, long-term and sub-acute care facilities, veterinary offices, municipalities and retail pharmacies.

During 2009, the company completed 23 acquisitions, of which 16 were regulated waste businesses in the United States and seven were regulated waste businesses in Canada, Latin America, and Europe.

### Services and Operations

**Collection and Transportation:** In many respects, its regulated waste business is one of logistics. For regulated waste, the company supplies specially designed reusable leak- and puncture-resistant plastic containers to most of its customers.

The company collects containers or corrugated boxes of regulated waste from its customers at intervals depending upon customer requirements, contract terms and volume of waste generated. The waste is then transported directly to one of its processing or facilities or to one of its transfer stations where it is combined with other regulated waste and transported to a processing facility. The company collects some expired or recalled products, but more typically, customers ship them directly to its processing facilities.

**Processing and Disposal:** Upon arrival at a processing or facility, containers or boxes of regulated waste are typically scanned to verify that they do not contain any unacceptable substances like radioactive material. Any container or box that is discovered to contain unacceptable waste is returned to the customer and the appropriate regulatory authorities are informed.

The regulated waste is then processed using one of its various treatment or processing technologies. Upon completion of the particular process, the resulting waste or incinerator ash is transported for resource recovery, recycling or disposal in a landfill owned by an unaffiliated third party. After plastic containers, such as its Steri-Tub or Bio Systems containers have been emptied, they are washed, sanitized and returned to customers for re-use.

Upon receipt at a processing facility, expired or recalled products are counted and logged, and controlled substances are stored. In accordance with the manufacturer's instructions, expired or recalled products are then returned to the manufacturer or destroyed in compliance with applicable regulations.

Documentation: The company provides documentation to its customers for all regulated waste that the company collects in accordance with applicable regulations and customer requirements.

## Competition

The company's major competitor is Waste Management, Inc.

## History

Stericycle, Inc. was founded in 1989.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
