Abstracts

Stinger Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Stinger Systems Inc. and its competitors. This provides our Clients with a clear understanding of Stinger Systems Inc. position in the Industry.

The report contains detailed information about Stinger Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Stinger Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Stinger Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Stinger Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Stinger Systems Inc. business.

About Stinger Systems Inc.

Stinger Systems, Inc. engages in producing and marketing less-than-lethal electro-stun products for the law enforcement, correctional facilities, professional security, and military sectors. It manufactures electronic stun devices for the control of, and to provide temporary immobilization of, dangerous persons. The company's products include the Ice-Shield electronic immobilization riot shield and the Band-It / REACT system, an electronic immobilizing restraint. Stinger Systems' primary focus is the S-200 AT projectile stun gun.

Products

Stinger S-200 AT Two Dart Projectile Stun Guns

The Stinger S-200 is a two-dart electronic immobilization device (EID). Features include an ambidextrous button to release the cartridge. This allows an officer to quickly reload without putting their hand in front of a live weapon. Other features include batteries, a programmable trigger firing sequence, and a recessed bolt safety. Its features also include a recessed cartridge so they would be protected from accidental dislodgement, a fight, or from vibration from motorcycles.

Ice-Shield Electronic Immobilization Riot Shield

The ICE Shield is an electrified riot shield designed to provide added protection for police, corrections and military personnel in hazardous crowd control situations. The product is in use by various organizations, including the New York City DOC and Riker's Island. Utilizing Stinger Systems electronic incapacitation technology, the shields are constructed of 1/4 polycarbonate Lexan and feature 9 sparking display points on the front to provide a visible deterrent. The power shield can be used as a traditional riot shield, or the operator can push a switch on the shield's handles to activate a less-lethal, immobilizing contact-shock. Applications to date have centered on hazardous crowd control, civil disturbances, prison disturbances, and forced cell entries.

Band-It / The R-E-A-C-T System, an Immobilizing Electronic Restraint

The Band-It (Remote Electronically Activated Control Technology (REACT)) serves as a deterrent and is designed for the movement of inmates by providing the security available without the use of lethal force. The Band-It is a prisoner restraint system that includes a universal sleeve which is placed either on a prisoner's leg or arm and an RF transmitter is held by a law enforcement official. If a prisoner tries to flee, the sheriff or bailiff can remotely activate the Band-It up to 150 feet away.

Markets

The company markets its products primarily to the law enforcement, correctional, professional security, and military sectors.

Competitors

The company primarily competes with Taser International, Inc.

History

The company was founded as United Consulting Corporation in 1996 and changed its name to Stinger Systems, Inc. in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
