Abstracts

STMicroelectronics NV Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between STMicroelectronics NV and its competitors. This provides our Clients with a clear understanding of STMicroelectronics NV position in the [Semiconductor](#) Industry.

The report contains detailed information about STMicroelectronics NV that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for STMicroelectronics NV. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The STMicroelectronics NV financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes STMicroelectronics NV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of STMicroelectronics NV business.

About STMicroelectronics NV

STMicroelectronics N.V. operates as an independent semiconductor company that designs, develops, manufactures and markets a range of semiconductor integrated circuits, and discrete devices. The company offers a product portfolio and develops products for a range of market applications, including automotive products, computer peripherals, telecommunications systems, consumer products, industrial automation, and control systems.

Products and activities

The company's products include discretely, microcontrollers, Smartcard products, standard commodity components, ASICs (full custom devices and semi-custom devices) and ASSPs for analog, digital, and mixed-signal applications.

The company operates through three product segments: Automotive, Consumer, Computer and Communication Infrastructure (ACCI); Industrial and Multi segment Sector (IMS); and Wireless. The company also designs, develops, manufactures, and markets subsystems and modules for various products in the telecommunications, automotive, and industrial markets in its Subsystems division.

ACCI

ACCI is responsible for the design, development, and manufacture of application-specific products using bipolar, CMOS, BiCMOS smart power technologies. The businesses in the ACCI offer system solutions to customers in application markets. All products are ASSPs, full-custom or semi-custom devices that may also include digital signal processor (DSP) and microcontroller cores.

ACCI comprises three major product lines — Automotive Products Group (APG); Computer and Communication Infrastructure (CCI); and Home Entertainment & Displays (HED). Furthermore, it also operates an imaging business with a product line called Imaging.

Automotive Products Group

The company's automotive products include airbag controls, anti-skid braking systems, vehicle stability control, ignition and injection circuits, multiplex wiring kits and products for body and chassis electronics, engine management, instrumentation systems and car infotainment. In addition, the company works with Freescale Semiconductor on 90nm and 55nm embedded Flash Technology and other common products based on 32 bit microcontrollers for use in automotive applications.

Car Body Division: The company manufactures products for the body and chassis electronics requirements of the car. These products range from microcontrollers used in lighting, door and window/wiper applications to junction boxes, power solutions, dashboards, and climate-control needs.

Car Radio and Multi-media Division: The company provides its customers with solutions for analog and digital car radio solutions for tolling, navigation and other telematic applications.

Digital Broadcast Radio Division: The company provides a number of components to the satellite radio market, including base-band products for the reception of signals.

Powertrain and Safety Division: The company's family of automotive products provide a range of features. The devices support various functions, enable improved vehicle performance and economy, and deliver development savings by promoting hardware and software reuse.

Computer and Communications Infrastructure

BCD Power Division: This organization serves the markets of hard disk drive (HDD) and Printers with products developed on its BCD technology. Main applications are motor controllers for HDD and motor drivers and head drivers for printers.

Communication Infrastructure Division: This division provides solutions for the wireless and wireline infrastructure segments. The company's wireline telecommunications products, mainly digital and mixed signal ASICs, are used for various application in the high-speed electronic and optical communications market. In the wireless field, the company focuses on the ASIC market, the fields of digital baseband, radio frequency and mixed-signal products.

Computer System Division: The company is focusing on inkjet and laser printer components. It supplies digital engines, including those in photo-quality applications and multifunction printers. The company is also expanding its offerings to include a reconfigurable ASSP product family, known as SPEAr (Structure

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
