Abstracts

Storage Computer Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Storage Computer Corp. and its competitors. This provides our Clients with a clear understanding of Storage Computer Corp. position in the Industry.

The report contains detailed information about Storage Computer Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Storage Computer Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Storage Computer Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Storage Computer Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Storage Computer Corp. business.

About Storage Computer Corp.

Storage Computer Corp (SCC) provides high performance storage software solutions focused on developing advanced storage architectures to address the emerging needs of high-bandwidth and other performance-impaired applications. Storage Computers technology supports a variety of applications including advanced database activities, wide area network storage and sophisticated business continuity topologies including: Networked Attached Storage; Storage Area Networks; Direct Attached Storage; and Storage Wide Area Networking.

Product Line

CyberNAS: The CyberNAS is a Network Attached Storage software package, which is modular and scalable and can be targeted to a range of end users. The product combines a disk storage subsystem, RAID implementation and file server all in one. The file system supports Microsoft Windows environment (CIFS), Unix (NFS) and AppleShare. The CyberNAS also has a diverse set of connectivity options including Ethernet, Gigabit Ethernet (wire speed) and OC12/48 (optical carrier).

Legacy Products

Storage Computer Cyber Ultra: The Cyber Ultra Series is designed for low to mid tier storage hardware applications. The unit delivers multi-channel 160MB/sec Ultra160 SCSI-3 throughput to both host and devices with an option for two Dual Loop Fibre to the Host channels. The Cyber Ultra is configurable from 72GB to 16TB with half height 18GB, 36GB, 73GB, 147GB, and 15,000-RPM Ultra160 SCSI-3 drives. The Ultra is scalable to multi-terabyte capacities.

Storage Computer CyberFibre: The CyberFibre is a SAN ready hardware solution entailing multiple host connections and flexibility to adapt to the most taxable storage applications. The system supports online dynamic addition of disk capacity to existing RAID set(s), With support for 18GB, 36GB, 73GB, 147GB and greater 10,000 and 15,000RPM drive configurations and up to 512 MB of cache per controller, the Storage Computer CyberFibre scales to 120 disk drives on a single controller.

Customers

Products are sold to customers across a broad range of industries including banking and financial services, education, technology, telecommunications, military/aerospace, general services, government, and manufacturing.

Competition

The Company's competitors include EMC Corporation, IBM Corporation, Hewlett-Packard, NCR Corporation, Storage Technology, Sun Microsystems.

History

Storage Computer Corporation was incorporated in Delaware in 1991.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
