Abstracts

Strategic Diagnostics Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Strategic Diagnostics Inc. and its competitors. This provides our Clients with a clear understanding of Strategic Diagnostics Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Strategic Diagnostics Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Strategic Diagnostics Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Strategic Diagnostics Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Strategic Diagnostics Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Strategic Diagnostics Inc. business.

About Strategic Diagnostics Inc.

Strategic Diagnostics Inc. develops, manufactures, and markets proprietary products, services, and solutions in the pharmaceutical, biotechnology, diagnostics, food safety, and environmental markets.

Business Units

The company operates through two business units, Life Sciences and Kit Products.

Life Sciences

The company provides a range of products and services, including custom antibodies, pre-made catalog antibodies, bulk 'diagnostic-grade' antibodies, proprietary critical reagent products, and associated bio-processing services. Its products and services are sold to, and often embedded in other commercial products used by a range of customers including pharmaceutical, biotechnology and diagnostic companies, and major biomedical research centers both domestically and internationally. The company is fully integrated to deliver a range of services encompassing its customers' immunosolution needs from antigen design and antibody development through large scale

production and post production bio-processing and immunoassay design and development.

Industrial BioDetection Tests

The company's detection technologies allow industrial customers to identify the presence of adulterants, such as chemical toxins, biological pathogens and other contaminants that can compromise human or environmental safety, and/or financially impact efficiencies of production processes.

Applications

Food and Beverage Manufacturing: Systems for high efficiency testing for the identification of pathogens and toxins in food, water and the manufacturing environment.

Water Utilities: Drinking water facilities test for chemical toxins and pathogens. Wastewater treatment facilities manage pollution control by monitoring efficiency maintenance in biological processing systems, specifically testing for influent and effluent toxic chemicals and pesticides.

Environmental Management: On-site testing systems to increase the speed and accuracy of environmental remediation of soil and ground water pollutants.

Agriculture and Agro-science: Systems for the detection, identity preservation, and quantification testing of genetically modified organisms, and test systems for feed and grain safety testing, including for the presence of mycotoxins.

Life Sciences Products and Services

The company produces antibodies to targets and biomarkers of interest allowing customers to quickly assess the feasibility, efficacy and safety of compounds in their developmental pipelines. The company is a supplier to manufacturers of antibody-based diagnostic tests. It provides proprietary reagents as well as large scale Original Equipment Manufacturer (OEM) production of custom antibodies.

Kit Products

Food Safety Products

The company's food safety product line includes enrichment media and tests to detect food pathogens, including E. coli O157 (including H7), Listeria and Salmonella. The company tests targeted traits in genetically engineered plants, tests to detect Genetically Modified (GM) traits in grain, seeds, food ingredients and food fractions and tests to detect naturally occurring fungi in grains (mycotoxins).

Food Pathogen Testing: The company engages in the development and market introduction of products for the detection of pathogenic microorganisms in food. It provides test method for the pathogen E. coli O157 (including H7). The RapidChek E. coli O157:H7 test strips and proprietary media system have received ongoing market acceptance in the United States. It also provides test for detection of Listeria. The Listeria test incorporates the use of a proprietary enrichment procedure that provides results in 40 hours. It offers RapidChek SELECT Salmonella test with AOAC-RI approval at the International Association of Food Protection Meeting in Calgary, Canada.

Agricultural Testing

Genetically Modified Crops: Tests for GM traits are generally used to determine whether the sample tested contains the protein associated with the genetic modification. Seeds, grain or leaf tissue are typically tested. Among the commodities typically tested with the company's products are corn, soybeans, rice and cotton.

The company has develop

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
