The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Straumann Holding AG business.

About Straumann Holding AG

Straumann Holding AG engages in the research, development, and manufacture of implants, instruments, CAD/CAM prosthetics, and tissue regeneration products for use in tooth replacement and restoration or to prevent tooth loss. The company sells its products in Europe, North America, the Asia Pacific, and rest of the world.

Products and Services

The company offers dental implant system, which comprises a line of surgical implants; prosthetic components, such as abutments and copings that connect the implant with the crown of the replacement tooth; and a range of matching precision instruments and handling components. The company's regenerative system offers treatment options that help to rescue teeth or support tooth replacement.

The company's soft tissue regeneration product is Emdogain, which is used in periodontal treatment to regenerate the tissues that support the tooth. It also offers a bone augmentation product, BoneCeramic, which is a synthetic and biocompatible product that is designed to support the patient's own bone regeneration and bone volume restoration. It also offers membrane products that stabilize the bone graft and prevent unwanted soft-tissue infiltration.

The company offers a range of CAD/CAM dental prosthetics and related technology. It assembles and supplies compact scanners, which are sold or leased in combination with proprietary modeling software to dental laboratories. The company's solutions for tooth restoration include single-tooth inlays, onlays, crowns, and 14-unit restorations. The company offers a choice of biocompatible and esthetic materials, including ceramics, such as Zerion, a highly pure zirconium oxide.

The company also offers training and services to the dental profession worldwide, including training and education, which is provided in collaboration with the International Team for implantology (ITI).

Customers

The company offers its products to oral and maxillofacial surgeons, prosthodontists, periodontists, general dentists, and dental technicians.

Acquisitions

In January 2008, the company gained control of its business in the Czech Republic and Slovakia by acquiring 100% of the interest in its Czech distributor Ormedent spol sro, based in Prague, Czech Republic. The company was subsequently renamed Straumann sro.

In 2008, the company completed the acquisition of its former Korean distributor, B.I.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
