Abstracts

Striker Oil & Gas, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Striker Oil & Gas, Inc. and its competitors. This provides our Clients with a clear understanding of Striker Oil & Gas, Inc. position in the Industry.

The report contains detailed information about Striker Oil & Gas, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Striker Oil & Gas, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Striker Oil & Gas, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Striker Oil & Gas, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Striker Oil & Gas, Inc. business.

About Striker Oil & Gas, Inc.

Striker Oil & Gas, Inc. engages in the exploration, acquisition, development, production and sale of natural gas, crude oil and natural gas liquids primarily from conventional reservoirs within the United States. The company has operations in the states of Louisiana, Mississippi and Texas.

In June 2005, the company acquired an approximate 35% working interest in the Abbeville Field located in Vermillion Parish, Louisiana. It also acquired additional working interests from individuals in the Abbeville Field. In June 2005, the company obtained a 40% before payout working interest, 30% after payout working interest, in the North Edna prospect to drill an approximate 9,000 foot test well in Jefferson Davis Parish, Louisiana. As of April 11, 2008, the Lejuene Well No. 1 is producing approximately 140 gross barrels of oil per day.

The company entered into an agreement to drill an approximate 6,800 foot well to test the Upper Tuscaloosa formation in Greene County, Mississippi. The Lee Walley Estate Well No. 2 was drilled to a total depth of approximately 6,925 feet and encountered approximately six feet of oil pay sands. It has a 60% working interest and an approximate 47.55% net revenue interest. In September 2006, the company entered into a farmout agreement to participate in the South Creole prospect located in

Cameron Parish, Louisiana. It has 28.33% before payout working interest and an approximate 19% before payout net revenue interest in the well.

In January 2007, the company entered into an agreement to participate in the North Cayuga prospect located in Henderson County, Texas. This prospect, included approximately 450 gross acres, has the potential for eight wells. It has a 21% before payout working interest in the initial well and an approximate 16% working interest in all subsequent wells in this prospect.

In April 2007, the company entered into a participation agreement to participate in the Catfish Creek prospect located in Henderson and Anderson Counties, Texas.

In June 2007, the company acquired a 100% working interest in the Welsh Field located in Jefferson Davis Parish, Louisiana from two separate sellers. The Welsh Field has two wells producing approximately 45 gross barrels of oil per day, two salt water disposal wells and an additional ten wells which were not producing. In addition to the Welsh Field, the company obtained additional acreage in the North, Northeast and Northwest Welsh prospects.

Significant Events

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
