Abstracts

Suntech Power Holdings Co. Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Suntech Power Holdings Co. Ltd. and its competitors. This provides our Clients with a clear understanding of Suntech Power Holdings Co. Ltd. position in the [Semiconductor Industry](#).

The report contains detailed information about Suntech Power Holdings Co. Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Suntech Power Holdings Co. Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Suntech Power Holdings Co. Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Suntech Power Holdings Co. Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Suntech Power Holdings Co. Ltd. business.

About Suntech Power Holdings Co. Ltd.

Suntech Power Holdings Co., Ltd. operates as a solar energy company. The company designs, develops, manufactures, and markets various PV cells and modules, including a range of value-added BIPV (building-integrated photovoltaics) products. Its products are used to provide electric power for residential, commercial, industrial and public utility applications in various markets worldwide. The company also provides PV (photovoltaic) system integration services to customers in China and the United States.

Products and Services

The company's products are used to provide reliable and environmentally friendly electric power for residential, commercial, industrial and public utility applications in various markets worldwide. The company also provides commercial and utility scale PV system integration services in both the United States and China.

PV Cells

A PV cell is a semiconductor device made from a silicon wafer that converts sunlight into electricity by photovoltaic effect. The company produces various monocrystalline

and multicrystalline silicon PV cells.

PV Modules

A PV module is an assembly of PV cells that have been electrically interconnected and encapsulated via a lamination process into a durable and weather-proof package. The company produces various PV modules ranging from two to 290 watts in power, with higher output modules under development.

BIPV

The company's Just Roof product and SolarBlend solar tile are products where the solar panel displaces the traditional roofing material. In addition to sales of BIPV products under the Suntech brand, the company also sells its BIPV products as part of an OEM strategy which are sold under other brand names. The company has ongoing relationships with several technology and channel partners, including Akeena Solar, Applied Solar (formerly Open Energy Corporation), Eagle Roofing, and DRI/Lumeta.

Markets

The company sells its products in various markets worldwide, including Spain, Germany, the United States, China, South Korea, Italy, the Middle East, Australia and Japan. The company also provides PV system integration services in China and the United States.

Sales and Marketing

The company also has been actively establishing local sales offices in its markets such as Spain, Italy, Germany, Japan, Australia, South Korea and the Middle East. The company has established local sales and service offices in Dubai, Madrid, Milan, Munich, San Francisco, Seoul, Sydney, Schaffhausen (outside of Zurich), and Tokyo.

Customers

The company's major international customers include IBC Solar, Energiebau Solarstromsysteme GMBH, Krannich Solar GMBH, Energetica Wing SRL, and EDF EN Development.

Significant Events

On October 5, 2010, National Semiconductor Corporation announced that it is collaborating with Suntech Power Holdings Co. Ltd. to develop 'smart panel' technology, incorporating National Semiconductor's award-winning SolarMagic power optimizer chipset into Suntech solar panels to improve the power output of solar systems.

On October 11, 2010, Azuray Technologies, Inc. announced it is collaborating with Suntech Power Holdings Co. Ltd. to explore 'smart panel' solutions targeted at bringing greater solar energy generation to new solar installations.

In October 2010, Suntech Power Holdings Co. Ltd. and CaliSolar, Inc. announced that the companies have signed an agreement to construct a solar silicon manufacturing facility in Ontario Canada.

In December 2010, Suntech Power Holdings Co. Ltd. would form a joint venture with Wuxi Industrial Development Fund and Wuxi New District E&D Group to own and operate a 1.2GW PV cell production facility located at the heart of Suntech's Wuxi campus.

Competition

The company's competitors include PV divisions of large conglomerates such as Sharp Corporation, specialized cell manufacturers such as Q-Cells AG, as well as integrated manufacturers of PV products such as Kyocera Corporation, Renewable Energy Corporation, SolarWorld AG and SunPower Corporation. The company's competitors also include Trina Solar; Yingli Solar; and First Solar, Inc.

History

Suntech Power Holdings Co., Ltd. was founded in 2001.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
