The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SVB Financial Group business.

About SVB Financial Group

SVB Financial Group operates as a diversified financial services company, as well as a bank holding company and financial holding company. Through its subsidiaries and divisions, the company offers various banking and financial products and services to the technology, life science, venture capital/private equity, and premium wine industries.

The company offers commercial banking products and services through its principal subsidiary, Silicon Valley Bank (the bank), which is a California state-chartered bank. Through its subsidiaries, the bank also offers brokerage, investment advisory, and asset management services. It also offers non-banking products and services, such as funds management, private equity investment, and equity valuation services, through its subsidiaries and divisions. It operates through 27 offices in the United States, as well as offices internationally in China, India, Israel, and the United Kingdom.

Segments

The company operates in four segments: Global Commercial Bank, Relationship Management, SVB Capital, and Other Business Services.

Global Commercial Bank

The Global Commercial Bank segment's products and services are provided by the bank and its subsidiaries. The bank provides solutions to the financial needs of commercial clients through lending, deposit products, cash management services, and global banking and trade products and services. It also serves the needs of its non-U.S. clients with global banking products, including loans, deposits and/or global finance, in key international entrepreneurial markets.

Through lending products and services, the bank extends loans and other credit facilities to commercial clients. These loans are often secured by clients' assets. Lending products and services include traditional term loans, equipment loans, asset-based loans, revolving lines of credit, accounts-receivable-based lines of credits, and capital call lines of credits.

The bank's deposit and cash management products and services provide commercial clients with short- and long-term cash management solutions. Deposit products include traditional deposit and checking accounts, certificates of deposit, money market accounts, and sweep accounts. In connection with deposit services, the bank provides lockbox and merchant services that facilitate depositing of checks and other payments to clients' accounts. Cash management products and services include wire transfer and automated clearing house (ACH) payment services to enable clients to transfer funds from their deposit accounts. Additionally, the cash management services unit provides collection services, disbursement services, electronic funds transfers, and online banking through SVBeConnect.

The bank's global banking and trade products and services facilitate clients' global finance and business needs. These products and services include foreign exchange services that allow commercial clients to manage their foreign currency needs and risks through the purchase and sale of currencies, swaps and hedges on the global inter-bank market. To facilitate clients' international trade, the bank offers various loans and credit facilities guaranteed by the Export-Import Bank of the United States. It also offers letters of credit, including export, import, and standby letters of credit, to enable clients to ship and receive goods globally.

The bank and its subsidiaries offer various investment services and solutions to its clients that enable companies to manage their assets. Through its broker-dealer subsidiary, SVB Securities, the bank offers money market mutual funds and fixed-income securities. Through its registered investment advisory subsidiary, SVB Asset Management, the bank offers investment advisory services, including outsourced

treasury services, with customized cash portfolio management and reporting.

Relationship Management

The Relationship Management segment provides banking products and services through the bank to its premium wine industry clients, including vineyard development loans, as well as a range of private banking services to targeted high-net-worth individuals.

SVB Wine is a division of the bank

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
