Such information creates your awareness about principal trends of Swatch Group AG business.

About Swatch Group AG

The Swatch Group AG operates as a manufacturer and distributor of finished watches worldwide. It produces watches and movements for watches or analog systems. The company also engages in the design, production, and marketing of electronic components. It provides general services, and research and development activities.

The company's activities are organized into in four operating segments that include Watches segment, which markets finished watches; Watch production segment manufactures watches and watch movements; Electronic systems segment engages in the design, production and marketing of electronic components; and General services segment, which serves and finance companies, research and development, and real estate companies.

The company offers Breguet, Blancpain, Jaquet-Droz, Glashutte-Original/Union, Leon Hatot, Omega, Longines and Rado in the luxury segment; Tissot, Calvin Klein, Certina, Mido, Hamilton and Pierre Balmain in the middle segment; and Swatch and Flik Flak in the basic segment. Endura produces 'private label' watches.

The company is also active in the field of telecommunications and the automobile sector, as well as in the service sector. This includes sports timing, which measures the

time at multiple international sports events and most of the Olympic Games. The Swatch Group is also official timekeeper and data handling operator for the Olympic Games in Athens, Torino, Beijing and other cities.

In January 2008, Swatch Group and Tiffany & Co. have signed a 20-year deal to develop, produce and distribute Tiffany watches worldwide. Under the terms of the agreement, a new incorporated company wholly owned by Swatch would be established in Switzerland, and would be authorized to use Tiffany's trademarks and operate under the Tiffany name. The distribution network of the new range of Tiffany watches would include Swatch affiliates, retail facilities and third-party distributors, in addition to Tiffany stores worldwide.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
