## Abstracts

SilverBow Resources, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between SilverBow Resources, Inc. and its competitors. This provides our Clients with a clear understanding of SilverBow Resources, Inc. position in the [Energy](#) Industry.

The report contains detailed information about SilverBow Resources, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for SilverBow Resources, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The SilverBow Resources, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes SilverBow Resources, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SilverBow Resources, Inc. business.

### **About SilverBow Resources, Inc.**

Swift Energy Company engages in developing, exploring, acquiring, and operating oil and natural gas properties in the inland waters of Louisiana and Texas. As of December 31, 2009, the company had estimated proved reserves of 112.9 million barrels of oil equivalent.

The company focuses primarily on development and exploration of fields in four core areas, including southeast Louisiana; South Texas; central Louisiana/East Texas; and South Louisiana. It addition, it has a strategic growth area with acreage in the Four Corners area of southwest Colorado.

#### **Southeast Louisiana**

Lake Washington: As of December 31, 2009, the company owned drilling and production rights in 24,624 net acres in the Lake Washington field located in southeast Louisiana nearshore waters within Plaquemines Parish. In 2009, the company drilled and completed 4 out of 5 development wells in Lake Washington. It also drilled 2 exploratory wells and completed one of them in Lake Washington. As of December 31, 2009, the company had 96 proved undeveloped locations in this field.

**Bay de Chene:** The Bay de Chene field is located along the border of Jefferson Parish and Lafourche Parish in nearshore waters approximately 25 miles WNW of the Lake Washington field. As of December 31, 2009, the company owned drilling and production rights in approximately 16,035 net acres in the Bay de Chene field. As of December 31, 2009, the company had three proved undeveloped locations in the Bay de Chene field.

#### South Texas

**AWP:** The AWP field is located in McMullen County, Texas. As of December 31, 2009 the company owned drilling and production rights in 71,997 net acres in the field and was operating 569 wells producing oil and natural gas from the Olmos sand formation at depths from 9,000 to 11,500 feet. The company owns approximately 100% of the working interests in these operated wells. As of December 31, 2009, the company had 83 proved undeveloped locations in the field.

**Eagle Ford Joint Venture:** In November 2009, the company entered into a joint venture agreement with an independent oil and gas producer to jointly develop and operate an approximate 26,000 acre portion of its Eagle Ford Shale acreage in McMullen County, Texas. The company retains a 50% interest in the joint venture that calls for joint development of this area located in its AWP field and covers leasehold interests beneath the Olmos formation (including the Eagle Ford Shale formation) extending to the base of the Pearsall formation.

**Sun TSH, Briscoe Ranch, and Las Tiendas:** The company owns operating interests in three additional Olmos sand reservoirs producing in the Maverick Basin. These properties are in the Sun TSH field located in La Salle County, Briscoe Ranch field located in Dimmitt County and the Las Tiendas field located in Webb County. The fields produce primarily natural gas from depths of 4,500 to 7,500 feet. As of December 31, 2009, the company owned drilling and production rights in 97,502 net acres in these fields (21,882 in Sun TSH, 66,998 in Briscoe Ranch, and 8,622 in Las Tiendas). In 2009, the company drilled and completed 2 development wells drilled in these fields. As of December 31, 2009, the company was operating 243 wells in these fields and had 118 proved undeveloped locations.

#### Central Louisiana/East Texas

**Brookeland:** The Brookeland field area is located in Newton County and Jasper County, Texas, and Vernon Parish, Louisiana. As of December 31, 2009, the company owned drilling and production rights in 56,355 net acres and 3,500 fee mineral acres in this

field. Oil and natural gas are produced from natural fractures encountered within the lateral borehole sections from depths of 11,500 to 13,500 feet. As of December 31, 2009, the company had 10 proved undeveloped locations in the field.

In August 2009, the company entered into a joint venture agreement with an independent oil and gas producer active in the area for development and exploitation in and around the Burr Ferry field in Vernon Parish, Louisiana. The company, as fee mineral owner, leased a 50% working interest in approximately 33,623 gross acres to the joint venture partner. Swift Energy retains

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
