Symmetricom Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Symmetricom Inc. and its competitors. This provides our Clients with a clear understanding of Symmetricom Inc. position in the **Computers and Electronic Equipment Industry**.

- The report contains detailed information about Symmetricom Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for Symmetricom Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The Symmetricom Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Symmetricom Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Symmetricom Inc. business.

About Symmetricom Inc.

Symmetricom, Inc. supplies timing and synchronization hardware, software and services. The company also provides perceptual video quality monitoring solutions for triple-play voice, data, and digital video.

The company sells its solutions to communication service providers, government agencies, enterprises, and research facilities. Its products include atomic frequency references, such as rubidium and cesium oscillators; hydrogen masers; GPS time and frequency receivers, as well as time and frequency distribution

systems; network management software; video quality monitoring solutions, and professional services.

Segments

The company is organized into five segments that are with in two divisions: Telecom Solutions Division, which consists of Wireline Products, Wireless/OEM (original equipment manufacturer) Products, Quality of Experience Assurance Products, and Global Services; and Timing, Test and Measurement Division.

TELECOM SOLUTIONS DIVISION

Telecom Solutions Division offers a suite of timing and synchronization products. Products include primary reference sources; edge clocks and distribution products for synchronization outside the network core; Building Integrated Timing Supply (BITS) and Sync Supply Unit (SSU) for the central office; network management and monitoring software; and synchronization subsystems for OEM integration. Its product portfolio also includes a suite of PackeTime technologies, such as IEEE 1588 (PTP), NTP and Data Over Cable Service Interface Specifications (DOCSIS) Timing Interface, addressing the timing and synchronization needs for next-generation networks (NGN). Symmetricom holds patents in control algorithms for deployments utilizing the Global Positioning System (GPS), DOCSIS Timing Interface (DTI) and Code Division Multiple Access (CDMA).

The Wireless/OEM segment serves the wireless market with synchronization and timing components and sub-system (module) products that are foundational to the operation of certain types of cellular base stations. The company builds a portfolio of precise time and frequency solutions to address the growing synchronization requirements of all layers of existing circuit switched network and packet networks.

The Quality of Experience Assurance segment provides a perceptual quality monitoring solution that enables carriers, Internet service providers and cable multi-service operators (MSOs) to understand actual video service quality, in real time, as experienced by end-users. Symmetricom targets telecommunications carriers and cable operators to monitor IP-based video service offerings.

Global Services segment provides services for Symmetricom's product lines.

TIMING, TEST AND MEASUREMENT DIVISION

Timing, Test and Measurement Division provides precision time and frequency instruments and reference standards for government and enterprise markets. Government markets include the aerospace, defense, metrology and timekeeping sectors. Products include synchronized clocks, network time servers, network time displays, time code generators, computer plug-in cards, primary reference standards, such as rubidium and cesium oscillator standards, and ruggedized crystal oscillators, and custom Time & Frequency systems. Customer applications include synchronization of communication networks, synchronization of computer networks, reference timing for radar, ranging, fire-control and other defense electronic systems, calibration of lab equipment, GNSS (Global Navigation Satellite Systems), and subsystem master timing. During early 2009, the division continued to emphasize government program business in secure mobile, satellite, and wireline communications, as well as other defense platform upgrades, including destroyers, submarines, and Unmanned Aerial Vehicles (UAVs). Key customers of the division included Boeing, Honeywell, Lockheed Martin, Northrop Grumman, Raytheon, General Dynamics, BAE, L3, DISA and various military procurement and service agencies. New products include Rubidium oscillator (XPRO), a new 1588 enabled transparent switch (TC100), a new Syncserver that is equipped with a SAASM GPS receiver, a new higher frequency low phase noise

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional

types of analyses requires extra time.
