Abstracts

Taiheiyo Cement Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Taiheiyo Cement Corp. and its competitors. This provides our Clients with a clear understanding of Taiheiyo Cement Corp. position in the [Building Products and Construction Materials Industry](#).

The report contains detailed information about Taiheiyo Cement Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Taiheiyo Cement Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Taiheiyo Cement Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Taiheiyo Cement Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Taiheiyo Cement Corp. business.

About Taiheiyo Cement Corp.

Taiheiyo Cement Corporation manufactures cement with operations in the Pacific Rim. The company has businesses in the Pan-Pacific region, including on the west coast of the United States, China, and southeast Asia. It owns and supplies limestone, and value-added mineral products to domestic and overseas markets.

The company supplies construction sites with a variety of products and technologies, including ordinary Portland cement, specialty cement, soil stabilizers, and ready-mixed concrete, used in a range of applications. It delivers services specifically modified to the needs of customers throughout Japan using a network of cement distribution facilities, such as Tokyo Service Station.

The company primarily sells limestone aggregate produced at quarries in various regions. Its main products are course aggregate and fine aggregate used in ready-mixed concrete. It also supplies sandstone and andesite as aggregate materials.

The company supplies coal-fired power plants with flue gas desulfurization materials, such as calcium carbonate made from limestone. These materials help prevent air pollution and acid rain. It recycles coal ash produced at power plants as a raw material

for cement and uses it to manufacture a variety of civil engineering materials. The company reuses waste plaster and uses slag and iron oxide as raw materials for cement. It also sells slag powder and other inorganic materials, coal, heavy oil, and other fuels, as well as chemicals and plaster.

The company is involved in leasing land for office buildings, large commercial stores, leisure facilities, distribution warehouses, and other structures, as well as in developing land for residential housing.

The company produces an array of concrete products required at construction sites. It also develops construction materials that utilize autoclaved lightweight aerated concrete (ALC) manufacturing technology to meet a variety of construction and civil engineering needs. The company also develops power-saving septic tanks that clean sewage by using microorganisms in the soil.

International business

The International Business Company is involved mainly in manufacturing and selling cement, and business of exporting to overseas markets. The company has 10 manufacturing plants in operation around the Pacific Rim regions, including three plants on the west coast of the United States, three plants in China, and plants in Vietnam, the Philippines, and South Korea. It has a production capacity of approximately 25 million tons.

Other Businesses

The company develops a variety of industrial systems, including mainstay ready-mixed concrete related systems and process management systems, as well as GPS-based vehicle traffic management systems, map searching systems, and concrete product related systems. The company offers distribution solutions encompassing marine transport, land transport, and warehouse operations. It provides engineering services for a variety of construction material manufacturing plants, notably cement plants.

History

Taiheiyo Cement Corporation was founded in 1881.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
