The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TAL Education Group business.

About TAL Education Group

TAL Education Group offers tutoring services to K-12 students covering core academic subjects, including mathematics, English, Chinese, physics, chemistry, and biology in the People's Republic of China.

The company's network consists of 109 learning centers and 87 service centers in Beijing, Shanghai, Shenzhen, Guangzhou, Tianjin, and Wuhan; 2 call centers in Beijing and Shanghai; and its online platform. The company's learning centers host teaching facilities and are physical locations where classes are being conducted. Its service centers offer consultation, course selection, registration, and other services.

Tutoring Services

The company delivers its tutoring services through small classes, personalized premium services (one-on-one tutoring), and online course offerings.

Small classes: The company primarily offers courses in small class settings. 90 of its 109 learning centers and 67 of its 87 service centers nationwide are devoted to offering small classes. A typical small class course consists of 15 or 16 sessions during each spring and fall school semester and 7 to 12 sessions during each summer and winter

break.

Personalized Premium Services: The company offers personalized premium services under its 'Zhikang' brand. It operates 19 learning centers and 20 services centers in Beijing that are devoted to personalized premium services. The company's personalized premium services provide customized curricula and course materials and schedules to suit each student's educational focus in a one-on-one student-teacher setting. It provides personalized premium services to cater to the specific requirements of its students, such as addressing weaknesses in particular subjects or topics, providing examination or competition preparation, and tailoring the pace of learning to accommodate above- or below-average learning curves.

Online Courses: The company offers selected online courses in math, Chinese, and English through its Web site, www.eduu.cn. As of August 31, 2010, the company had 22,009 accumulated student enrollments in its online courses and it delivered 10,237 recorded videos of online courses.

Competition

The company's competitors at the national level include New Oriental Education & Technology Group Inc.; Juren Education; Ambow Education Holding Ltd.; Xueda Education Technology (Beijing) Co., Ltd.; and ChinaEdu Corporation.

History

TAL Education Group was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
