Abstracts

Talecris Biotherapeutics Holdings Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Talecris Biotherapeutics Holdings Corp. and its competitors. This provides our Clients with a clear understanding of Talecris Biotherapeutics Holdings Corp. position in the Industry.

The report contains detailed information about Talecris Biotherapeutics Holdings Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Talecris Biotherapeutics Holdings Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Talecris Biotherapeutics Holdings Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Talecris Biotherapeutics Holdings Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Talecris Biotherapeutics Holdings Corp. business.

About Talecris Biotherapeutics Holdings Corp.

Talecris Biotherapeutics Holdings Corp., a biopharmaceutical company, engages in the production and marketing of plasma-derived protein therapies worldwide. The company develops, produces, markets, and distributes therapies that extend and improve the lives of people suffering from chronic and acute, often life-threatening, conditions, such as chronic inflammatory demyelinating polyneuropathy (CIDP), primary immune deficiencies (PI), alpha-1 antitrypsin deficiency, bleeding disorders, infectious diseases and severe trauma. The company's products are derived from human plasma, the liquid component of blood, which is sourced from its plasma collection centers or purchased from third parties, located in the United States. It also sells fractionated intermediate materials. The company's primary products have orphan drug designation to serve populations with rare, chronic diseases.

Products

The majority of the company's sales are concentrated in the therapeutic areas of:

Immunology/Neurology, primarily through its intravenous immune globulin (IGIV) product for the treatment of primary immune deficiency, CIDP, and Pulmonology, through its alpha-1 proteinase inhibitor (A1PI) product for the treatment of alpha-1 antitrypsin deficiency-related emphysema. These therapeutic areas are served by its branded products, Gamunex brand IGIV (Gamunex or Gamunex IGIV), Prolastin brand A1PI (Prolastin or Prolastin A1PI), and its A1PI product, Prolastin-C. The company also has a line of hyperimmune therapies that provide treatment for tetanus, rabies, hepatitis B, hepatitis A and Rh factor control during pregnancy and at birth.

In addition, the company provides plasma-derived therapies for critical care, including the treatment of hemophilia, an anti-coagulation factor, as well as albumin to expand blood volume. The company's products are primarily prescribed by specialty physicians, including neurologists, immunologists, pulmonologists, and hematologists.

IGIV—Gamunex

IGIV products are antibody-rich plasma therapies that have long been used in the treatment of immune related disorders, such as primary immune deficiencies and certain autoimmune disorders, such as CIDP.

The approved indications for Gamunex IGIV in the U.S., Canada and 17 countries in the European Union are Primary Immunodeficiency (PI), Idiopathic Thrombocytopenic Purpura (ITP), and Chronic Inflammatory Demyelinating Polyneuropathy (CIDP). Gamunex IGIV is also approved in the European Union and Canada for post bone marrow transplant and pediatric HIV infection. Gamunex IGIV is also approved in the European Union for Kawasaki Disease, Guillain Barre Syndrome, Chronic Lymphocytic Leukemia, and Multiple Myeloma.

On November 14, 2008 Talecris Biotherapeutics GmbH, its German subsidiary, filed a type II variation to support the inclusion of the neurological indication Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) for Gamunex 10%. The procedure included the following European Member States as Concerned Member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Finland, Greece, Hungary, Ireland, Luxembourg, Poland, Portugal, Sweden, the Netherlands, and the United Kingdom. On June 12, 2009, the Paul-Ehrlich Institute approved the inclusion of CIDP as a new indication for Gamunex/Gaminex 10% for Germany.

A1PI—Prolastin/Prolastin-C

A1PI is a naturally occurring, self-defensive protein produced in the liver. A1PI is used to treat congenital A1PI deficiency-related emphysema.

Hyperimmunes

Hyperimmunes are antibody rich preparations, the majority of which are used to provide antibodies to counter specific antigens. Other products (hyperimmune globulins) are made from human plasma collected from donors with immunity to specific diseases. The company offers a line of FDA approved hyperimmunes for hepatitis A, hepatitis B, rabies, tetanus and treatment of Rh negative women pregnant with Rh positive children.

Albumin and PPF

Albumin is the most abundant protein in human plasma. It is a protein synthesized by the liver and performs multiple functions, including the transport of small molecules in the blood and the binding of toxins and he

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
