Abstracts

Team Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Team Inc. and its competitors. This provides our Clients with a clear understanding of Team Inc. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Team Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Team Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Team Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Team Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Team Inc. business.

About Team Inc.

Team, Inc. provides specialty maintenance and construction services required in maintaining high temperature and high pressure piping systems and vessels that are utilized in heavy industries.

Services

The company offers various complementary services, including leak repair, hot tapping, fugitive emissions control, field machining, technical bolting, field valve repair, non-destructive testing, and field heat treating.

Leak Repair Services: The company's leak repair services consist of on-stream repairs of leaks in pipes, valves, flanges, and other parts of piping systems and related equipment. Its on-stream repairs utilize both standard and custom-designed clamps and enclosures for piping systems. The company's leak repair services involve inspection of the leak by its field crew who record pertinent information about the faulty part of the system and transmit the information to its engineering department for determination of appropriate repair techniques.

Hot Tapping Services: The company's hot tapping services consist of providing a range of hot tapping, Line-stop and Freeze-stop services with capabilities for up to 48 inches

diameter pipelines. Hot tapping services involve utilizing special equipment to cut a hole in a pressurized pipeline so that a new branch pipe can be connected onto the existing pipeline without interrupting operations. Line-stop services permit the line to be depressurized downstream so that maintenance work can be performed on the piping system. The company typically performs these services by mechanically cutting into the pipeline similar to a hot tap and installing a special plugging device to stop the process flow. The Hi-stop is a proprietary and patented procedure that allows stopping of the process flow in extreme pressures and temperatures.

Emissions Control Services: The company provides fugitive volatile organic chemical (VOC) emission leak detection services that include identification, monitoring, data management, and reporting primarily for the chemical, refining, and natural gas processing industries. These services are designed to monitor and record VOC emissions from specific process equipment and piping components as required by environmental regulations and customer requests, typically assisting the customer in improving an ongoing maintenance program and/or complying with environmental regulations. The company provides specialty trained technicians in the use of portable organic chemical analyzers and data loggers to measure potential leaks at designated plant components maintained in customer or its proprietary databases. It also provides custom-designed reports to customer specifications.

Field Machining Services; Technical Bolting: The company uses portable machining equipment to repair or modify machinery, equipment, vessels, and piping systems not removed from a permanent location. The company provides customers technical bolting as a complimentary service to field machining during turnaround or maintenance activities. These services involve the use of hydraulic or pneumatic equipment with bolt tightening techniques to get leak-free connections following plant maintenance turnarounds or expansion projects. Additional services include bolt disassembly and hot bolting, which is a process to remove and replace a bolt as the process is operating.

Field Valve Repair Services: The company performs on-site repairs to manual and control valves, and pressure and safety relief valves, as well as specialty valve actuator diagnostics and repair. The company provides transportable trailers to the plant site which contain specialty machines to manufacture valve components without removing the valve from the piping system. In addition, the company provides preventive maintenance programs for VOC specific valves and valve data management programs.

Non-destructive Testing Services: The company offers inspection and evaluation of piping, piping components, and equipment to determine the present condition and

predict remaining operability. Its inspection services use the common methods of non-destructive testing, including radiography, ultrasound, magnetic particle an

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
