The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Teche Holding Company business.

About Teche Holding Company

Teche Holding Company operates as the holding company for Teche Federal Bank, which offers various financial services in Louisiana.

The company's primary market area includes St. Mary, Lafayette, Parishes of Iberia, St. Martin, Terrebonne, upper Lafourche, East Baton Rouge, St. Landry, and Ascension Parishes, Louisiana. It operates from its main office located in New Iberia, Louisiana and has 20 other offices.

Lending Activities

As of September 30, 2010, the company's loan portfolio included one- to four-family mortgage loans; multi-family mortgage loans; land loans; construction loans; commercial real estate loans; commercial non-real estate loans; home equity loans; loans on savings accounts; mobile home loans; and other secured and unsecured loans.

One- to Four-Family Residential Real Estate Loans: The company originates single-family owner occupied residential mortgage loans. It offers fixed-rate and adjustable-rate mortgage loans with terms of approximately 30 years.

Construction Loans: The company's construction loans have primarily been made to finance the construction of single-family owner occupied residential properties and single family housing for sale by contractors.

Multi-Family and Commercial Real Estate Loans: The company originates loans secured by multi-family (approximately four family units) properties. It also originates loans secured by commercial real estate, primarily office buildings (both owner and non-owner occupied), and development loans to builders.

Commercial Non-real Estate Loans: The company's commercial non-real estate loans are commercial business loans primarily to small business owners in its market area. These loans are typically secured by equipment, machinery, and other business assets and have terms of three to five years.

Land Loans: The company invests in residential lot loans to individuals and commercial land development loans.

Home Equity Loans: The company also offers home equity loans on single family residences. It offers adjustable rate home equity lines of credit. The majority of the home equity portfolio has fixed rates with a maximum term of 30 years.

Consumer Loans: The company also offers loans in the form of loans secured by deposits, home equity loans, automobile loans, mobile home loans, and unsecured personal consumer loans.

Investment Activities

The company invests in residential mortgage-backed securities, including collateralized mortgage obligations (CMOs), investment securities, and interest-bearing deposits. Its investments in mortgage-backed securities and CMOs include securities issued by government agencies, private issuers, and financial institutions.

Deposits

The company offers a selection of deposit instruments, including regular savings, demand and NOW accounts, and certificates of deposit.

History

Teche Holding Company was founded in 1934.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
