The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Teck Resources Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Teck Resources Limited business.

About Teck Resources Limited

Teck Resources Limited engages in the exploration for, and the development and production of, natural resources.

Products

The company's principal products are copper concentrate and copper cathode, metallurgical coal, and zinc concentrate and refined zinc. The molybdenum and lead are produced at its copper operations and zinc operations, respectively. Other products include gold, silver, various specialty metals, chemicals, and fertilizers. The company also has a 20% interest in the Fort Hills Energy Limited Partnership, which is developing the Fort Hills oil sands project in Alberta, and a 50% interest in certain other oil sands leases in Alberta at various stages of exploration.

Copper: The company produces both copper concentrates and cathode copper. Its principal market for copper concentrates is Asia. It also sells in the Europe and North America.

Zinc: The company's principal markets for zinc concentrates are Asia and Europe. Its principal markets for refined zinc are North America and Asia. Refined zinc produced at

Trail is distributed to customers in North America by rail and/or truck and to customers in Asia by ship.

Metallurgical Coal: The company's principal markets for metallurgical coal are the hard coking coal markets in Asia, Europe, and the Americas.

COPPER

Copper Operations

Antamina Mine, Peru (Copper, Zinc): The company owns indirectly 22.5% of the Antamina copper, zinc mine in Peru, with the balance held indirectly by BHP Billiton (33.75%), Xstrata plc (33.75%), and Mitsubishi Corporation (10%). The Antamina property consists of various mining concessions and mining claims (including surface rights) covering an area of approximately 14,000 hectares.

Highland Valley Copper Mine, Canada (Copper): The company has an aggregate 97.5% partnership interest in the Highland Valley Copper mine located near Kamloops, British Columbia. Highland Valley's primary product is copper concentrate but it is also a producer of molybdenum in concentrate. The mine covers a surface area of approximately 34,000 hectares and HVC holds the surface rights to that area pursuant to various leases, claims and licenses.

Quebrada Blanca Mine, Chile (Copper): The Quebrada Blanca mine is owned by a Chilean private company, Compañía Minera Quebrada Blanca S.A. (CMQB). The company owns 90% of the Series A shares of CMQB. CMQB owns the exploitation and/or exploration rights over an area of approximately 80 square kilometers in the immediate area of the Quebrada Blanca deposit pursuant to various mining concessions and other rights. In addition, CMQB owns surface rights covering the mine site and other areas aggregating approximately 3,150 hectares, as well as certain other exploration rights in the surrounding area and certain water rights. The Quebrada Blanca mine is located in northern Chile approximately 240 kilometers southeast of the port city of Iquique and 1,500 kilometers north of the city of Santiago, the capital of Chile.

Andacollo Mine, Chile (Copper): The Andacollo property is owned by a Chilean private company, Compañía Minera Carmen de Andacollo (CDA). The company owns 100% of the Series A shares of CDA. CDA owns the exploitation and/or exploration rights over an area of approximately 206 square kilometers in the area of the Andacollo supergene

and hypogene deposits pursuant to various mining concessions and other rights. In addition, CDA owns the surface rights covering the mine site and other areas aggregating approximately 21 square kilometers, as well as certain water rights.

Duck Pond Mine: The company holds a 100% interest in the Duck Pond copper-zinc property located in central Newfoundland. The Duck Pond property is located in central Newfoundland approximately 100 km southwest of the city of Grand Falls-Windsor. The property covers 12,847 hectares and is held under various mining and surface leases, mineral licenses and contractual mining rights. The Duck Pond deposit is a relatively flat-lying Cambrian-age, volcanogenic massive sulphide (VMS) lens enriched in copper and zinc with lesser lead, silver, and gold.

Copper Projects

Relincho, Chile: In August 2008, the company acqu

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
