The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Teijin Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Teijin Ltd. business.

## **About Teijin Ltd.**

Teijin Limited, through its subsidiaries, offers solutions in the areas of materials and health care.

### Segments

The company has five industry segments: Synthetic Fibers; Films and Plastics; Pharmaceuticals and Home Health Care; Trading and Retail; and IT and New Products.

### SYNTHETIC FIBERS

The Synthetic Fibers Segment engages in the production and sale of polyester filaments and other fibers for apparel and industrial applications, and artificial leather.

### Products

**Polyester Fibers:** The company offers polyester fibers under Teijin and Tetoron brand names, which are used in apparel, such as men's and ladies' fashions, sportswear, work and school uniforms, inner wear, and garment lining fabrics; interior decorating and household products, such as curtains, upholstery, bedding, office fabrics, paper diapers, wiping cloths, wet tissues, air purifier filters, and mattress filling; and industrial

products and materials, such as automobile, train and aircraft seats, tire cords, rubber reinforcements, seat belts, mats, cushions, and filters. The company also offers polyethylene naphthalate (PEN) fibers under the Teonex brand name, which are used in industrial products and materials, such as tire cords, transmission belts, high-pressure hoses, and speaker cones.

**Aramid Fibers:** The company offers para-aramid fibers under the Twaron and Technora brand names, which are used in brake pads, gaskets, rubber reinforcements (hoses, belts), tires, protective clothing, plastic reinforcements, civil engineering materials, and optical fiber reinforcements; meta-aramid fibers under the Teijinconex brand name, which are used in fireproof clothing, heat-resistant filters, rubber reinforcements, and plastic reinforcements; and artificial leather under the Cordley brand name, which is used in sporting goods (shoes and balls).

**Carbon Fibers:** The company offers carbon fibers under the Tenax brand name, which are used in aircraft (structural components and interior components), industrial applications (wind generator blades and pressure vessels), and sporting goods (golf club shafts, fishing rods, tennis racquets, and yacht bodies).

## FILMS AND PLASTICS

The Films and Plastics Segment engages in the production and sale of films and resins for various industrial applications.

### Products

**Films:** The company offers polyethylene terephthalate (PET) film under Teijin Tetoron, Mylar, Melinex, and Teflex brand names, which is used in industrial applications, such as materials for LCDs and plasma and organic electroluminescent displays (OELDs), cards (integrated circuit (IC) cards, ID cards, radio frequency identification (RFID) chips), and automotive products (interior and exterior materials and electronic components); and in packaging materials, such as laminating film for beverage and food cans, shrink wrap, retort pouches, and plastic trays. It also offers PEN film under Teonex brand name, which is used in digital videocassettes (DVCs), high-density data backup tapes, electronics materials, electronic circuit materials, materials for automotive applications (seat sensors and hybrid motor materials), and advanced photo system (APS) film. The company also offers processed film under Purex and CurrentFine brand names, which is used in applications, such as materials for LCDs, electronics materials, films for semiconductor materials, medical materials, photocatalysts, moisturizing facial

masks, flexible panel displays, touch panels, and membrane switch materials.

Plastics: The company offers polycarbonate resin under the Panlite brand name, which is used in electrical and electronics components, AV and OA equipment, personal computer (PC) casings, optical discs (blu-ray discs, DVDs, and CDs), precision instrument components, and automotive components (headlamps, door handles, and bumpers). It also offers polycarbonate resin under the Panlite sheet, ELECLEAR, and PURE-ACE brand names, which is used in sheet applications, such as LCD TV backlight diffusion plates, automotive instrument panels, nameplates, and helmet shields; and film applications, such as LCDs for mobile phones, personal digital assistants (PDAs) and other handheld

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
