## Abstracts

Teleflex Incorporated Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Teleflex Incorporated and its competitors. This provides our Clients with a clear understanding of Teleflex Incorporated position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about Teleflex Incorporated that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Teleflex Incorporated. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Teleflex Incorporated financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Teleflex Incorporated competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Teleflex Incorporated business.

## **About Teleflex Incorporated**

Teleflex Incorporated engages in the development, manufacture, and supply of single-use medical devices used by hospitals and healthcare providers for common diagnostic and therapeutic procedures in critical care and surgical applications. The company also serves niche segments of the aerospace and commercial markets with specialty engineered products.

### Segments

The company operates in three segments: Medical, Aerospace, and Commercial.

### MEDICAL

The Medical segment designs, develops, manufactures, and supplies medical devices for critical care and surgical applications. It categorizes its medical products into four product groups: Critical Care, Surgical, Cardiac Care, and OEM and Development Services. The Medical segment operates 30 manufacturing sites, with major manufacturing operations located in Czech Republic, Germany, Malaysia, Mexico, and the United States.

## Critical Care

The company's medical products are used in a range of critical care procedures for vascular access, respiratory care, anesthesia and airway management, treatment of urologic conditions, and other specialty procedures. The company provides specialty products for critical care. Its products are generally marketed under the brand names of Arrow, Rusch, HudsonRCI, Gibeck, and Sheridan. The majority of sales for disposable medical products are made to the hospital/healthcare provider market, with a smaller percentage sold to alternate sites.

## Vascular Access Products

The company's vascular access products are generally catheter-based products used in various clinical procedures to facilitate multiple critical care therapies, including the administration of intravenous medications, other therapies, and the measurement of blood pressure and taking of blood samples through a single puncture site.

The company's vascular access catheters and related devices consist principally of central venous access catheters, such as the following: the Arrow-Howe's Multi-Lumen Catheter, a catheter equipped with three or four channels, or lumens; double- and single-lumen catheters, which are designed for use in a variety of clinical procedures; the Arrow Pressure Injectable central venous access catheter (CVC), which gives clinicians who perform contrast-enhanced CT scans the option of using an indwelling pressure injectable Arrow CVC without having to insert another catheter for their scan; and percutaneous sheath introducers, which are used as a means for inserting cardiovascular and other catheterization devices into the vascular system during critical care procedures.

The company also provides a range of peripherally inserted central catheters, which are catheters inserted in the upper arm and advanced into the vena cava and are accessed for various types of intravenous medications and therapies, and radial artery catheters, which are used for measuring arterial blood pressure and taking blood samples. The company's offerings include a pressure injectable peripherally inserted catheter which addresses the therapeutic need for a catheter that can withstand the higher pressures required by the injection of contrast media for CT scans.

The company's vascular access products also include specialty catheters and related products used in a range of other procedures and include percutaneous thrombolytic devices, which are designed for clearance of thrombosed hemodialysis grafts in chronic

hemodialysis patients; and hemodialysis access catheters, including the Cannon Catheter, which is used to facilitate dialysis treatment.

The company's vascular access catheters are treated with the ARROWg+ard, or ARROWg+ard Blue Plus, antiseptic surface treatments to reduce the risk of catheter related infection. ARROWg+ard Blue Plus is a newer, longer lasting formulation of ARROWg+ard and provides antimicrobial treatment of the interior lumens and hubs of each catheter.

As part of its ongoing efforts to meet physicians' needs for safety and management of risk of infection in the hospital setting, the company sells a Maximal Barrier Precautions central venous access kit, which includes a body drape, a catheter treated with the ARROWg+ard antimicrobial tech

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
