The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TelVue Corp. business.

About TelVue Corp.

TelVue Corporation operates as a broadcast technology company. The company specializes in playback, automation, and workflow solutions for public, education and government (PEG) television stations, cable, telephone company (Telco) and satellite television providers, K-12 and higher education institutions, and professional broadcasters.

Segments

TelVue Products and Services (TPS) segment

TelVue Products and Services (TPS) segment, includes equipment, such as the TelVue Princeton broadcast and storage servers, and encoding and transcoding workstations (TelVue Princeton) and services, such as WEBUS and PEG.TV.

TelVue Princeton are high performance digital video systems, servers, and software that support capture, storage, manipulation and play-out of digital media in multiple popular formats. WEBUS is a broadcast digital signage system for displaying a fully automated TV station-like display on a cable system access channel using computer-based digital technology.

PEG.TV is a live streaming and Video-on-Demand service for integrating video on the Internet. TelVue markets TelVue Princeton, WEBUS, and PEG.TV to municipal governments, K-12 school districts, higher education institutions, cable and Telco Multi System Operators (MSOs), and other broadcasters.

TPS products include TelVue Princeton Digital Broadcaster B100, TelVue Princeton Digital Broadcaster B1000, TelVue Princeton Digital Broadcaster B3000, TelVue Princeton Digital Video Archive Server S3000F, TelVue Princeton Encoding Workstation C500W, and TelVue Princeton Encoding and Transcoding Workstation T7400E.

The company's TelVue Princeton Digital Broadcasters are all-in-one video servers, controlled from any connected Web browser that combines multiple functions in a single platform. These functions include playback, recording, content management, scheduling, automation, on-air graphics and broadcast digital signage. TelVue also offers workflow products for video ingest, transcoding, and storage under the TelVue Princeton brand. TPS services are as follows:

WEBUS: Automated broadcast digital signage display on TV Channel;

WEBUS Inside: WEBUS integrated with in TelVue Princeton Servers;

WEBLINX: Automated WEBUS message display on Websites;

VideoActives: Real time, dynamic video content for channels;

PEG.TV: Internet Streaming and Video-on-Demand Service; and

WEB-EM: Automated WEBUS message display on cell phones and email.

WEBUS is a Web-based, multi-user digital signage system that enables multiple, authorized users, such as township officials, school principals and civic leaders to update broadcast graphics and videos on their access channel and Web site from any Internet connected computer or mobile device. Authorized users can schedule messages, including real-time weather, traffic, and news 'on the 5s'.

WEBUS Inside is a version of the WEBUS digital signage display application that runs natively on the company's TelVue Princeton video server.

VideoActives are real-time, data-driven, on-air graphics, such as local weather, local

traffic, headline news, financial market indices, sports, quotes of the day, and trivia questions.

Other segment

The company's other segment is the marketing and service company, which sells automatic number identification (ANI) telecommunication services to the cable television industry. The ANI service permits cable and satellite television companies to process special ordering services without the attendant, high manpower requirements, or physical plant and facilities that are otherwise required.

The company provides the ANI service through the equipment it purchases. TelVue serves cable television systems across the United States via trunk lines and data circuits.

History

TelVue Corporation was founded in 1986.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
