Abstracts

Tengion, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Tengion, Inc. and its competitors. This provides our Clients with a clear understanding of Tengion, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Tengion, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Tengion, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Tengion, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Tengion, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tengion, Inc. business.

About Tengion, Inc.

Tengion, Inc., a development stage biotechnology company, develops, manufactures, and commercializes replacement neo-organs and neo-tissues. The company creates these functional neo-organs and neo-tissues using a patient's own cells, or autologous cells, in conjunction with its Organ Regeneration Platform.

Urologic Product Candidates

The company has two product candidates for the treatment of patients who require removal of their bladder in connection with the treatment of bladder, abdominal or pelvic cancer, or other severe bladder disease. Its Neo-Urinary Conduit is a combination of bioabsorbable materials and autologous muscle cells cultured by its scientists. It also has a product candidate, its Neo-Bladder Augment, for the treatment of neurogenic bladder, or dysfunctional bladder due to neurologic disease or condition, for which treatment often requires an augmentation of the bladder to relieve high bladder pressure and incontinence. The company's Neo-Bladder Augment, which has completed two Phase II clinical trials, regenerates bladder tissue to supplement the patient's existing bladder.

The company conducted two open-label, multi-center Phase II clinical trials of its Neo-Bladder Augment for the treatment of neurogenic bladder resulting from spina bifida in

pediatric patients and neurogenic bladder resulting from spinal cord injury in adult patients.

Other Product

The Tengion Neo-Kidney Augment

The company's Neo-Kidney Augment is designed to prevent or delay dialysis by increasing renal function in patients with CKD. Its Neo-Kidney Augment is based on its proprietary technology, which uses the patient's cells, procured by a needle biopsy of the patient's kidney, to create an implantable product candidate that can catalyze the regeneration of functional kidney tissue.

The Tengion Neo-GI Augment

This product candidate consists of smooth muscle cells, obtained from a routine fat biopsy, seeded on one of its proprietary bioabsorbable scaffolds, that can be used as a tubular or patch implant to accommodate patient needs.

The Tengion Neo-Vessel Replacement

The company is developing its Neo-Vessel Replacement for various blood vessel applications, including vascular access grafts, or arterio-venous, or AV, shunts, for patients with ESRD undergoing hemodialysis treatment, and for vessel replacement for patients undergoing coronary or peripheral artery bypass procedures. Its technology uses muscle cells isolated from fat tissue and endothelial cells isolated from blood samples, which are expanded ex vivo and then seeded onto a bioabsorbable scaffold in the shape of a blood vessel.

License Agreements

Exclusive License Agreement with Children's Medical Center Corporation: The company has a license agreement with Children's Medical Center Corporation, or CMCC, for the license of certain patent rights and intellectual property rights owned or controlled by CMCC related to autologous tissue engineering technology.

Wake Forest University Health Sciences License Agreement: The company has a license agreement with Wake Forest University Health Sciences, or WFUHS, for the license of WFUHS's intellectual property.

History

Tengion, Inc. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
